OTA Sponsored JOT Supplement: RFP

Objective

The OTA will offer funding for one supplementary issue of the Journal of Orthopaedic Trauma (JOT) annually. The objective is to support the JOT as the official journal of the OTA, and to provide the OTA membership with additional opportunity to publish information with significant impact for the orthopaedic community.

Key items of consideration in the review process:

- The focus of the monograph should be of direct interest and benefit to members of the OTA.
- The OTA has an interest in selecting topics that are not likely to be published through traditional publication processes.
- The topic should be of contemporary interest and not well addressed in current literature

Funding

The OTA will fund the publication of one electronic supplement per year. Authors seeking both electronic and print publication, and/or authors with a supplement page count over 60 pages will be required to secure outside funding to cover these additional costs. Please contact Krista Storm for assistance in budgeting: kstorm@lbghealth.com, and submit details with your application.

Requirements

The primary author of the supplement must be an OTA Member.

Application

Please submit a proposal to include: (a) a one-page abstract (b) a one-page description of the expected orthopaedic impact.

Submissions should be sent to: ota@ota.org, Attention: OTA JOT Supplement Review

Timeline/Deadline for Funding Requests

Funding requests must be received by November 7th.

Review Process

Funding requests will be reviewed by the OTA Board of Directors, and notification of funding decisions will be provided in February.
