

2013 OTA Annual Meeting

Introduction to ICD-10 for Orthopaedic Traumatologists

Moderator: M Bradford Henley, MD

Faculty: William R Creevy, MD and J Scott Broderick, MD

1. Introduction to session and ICD-10-CM (excluding ICD-10-PCS)
 - a. Rationale for change, benefits, potential liabilities
2. Ortho (trauma) surgeon documentation “gaps” between ICD-9 diagnostic coding/descriptions and ICD-10-CM
 - a. Case study from chart reviews at the UW (972 charts if I recall correctly)
 - b. Requirements for increased documentation specificity to meet the requirements of the new code set
3. Process to implement ICD-10
4. 2-trauma Case examples
 - a. 18yo high school football player with displaced bimalleolar ankle fx
 - b. 58yo MVC passenger with pelvic ring, R intertrochanteric fx
5. CodeX demo showing how this tool can be helpful
 - a. Demo a web based program (e.g. ICD10data.com)
6. Q&A
