Orthopaedic Trauma for PAs and NPs

OVERVIEW

The 2018 OTA PA/NP Orthopaedic Trauma Course offers PAs and NPs an exciting look at current state of the art fracture management. The course brings together leaders in Orthopaedic Trauma for lectures, case-based presentations, and lab sessions that illustrate the best practices in fracture care. The course discussions also include best practices for integration, billing, and coding for PAs and NPs in Orthopaedics.

LEARNING OBJECTIVES

Attendees of the Orthopaedic Trauma for PAs and NPs course will:

- ✓ Discuss compartment syndrome monitoring and treatment options.
- ✓ Discuss recognition of open fracture patterns and initial stabilization.
- ✓ Discuss incidence of osteoporosis, at risk patient populations, their evaluation and treatment.
- ✓ Review concepts of primary and secondary bone healing.
- ✓ Recognize fracture patterns to optimize provisional and definitive fixation.
- ✓ Identify pediatric elbow fracture types with indications for operative vs. non-operative treatment.
- ✓ Understand best practices in perioperative infection risk management.
- ✓ Review fixation techniques and indications for fracture stabilization.
- ✓ Discuss current advances in treatment of clavicle and proximal humerus fractures.
- ✓ Review the known intraoperative and post-operative complications of various techniques for amputations.
- ✓ Identify and review various surgical approaches, multiple implant/fixation options, and controversies in managing hindfoot injuries.
- ✓ Identify and review various surgical approaches, multiple implant/ fixation options, and controversies in managing ankle injuries.

TARGET AUDIENCE

This course is intended for PAs and NPs who are early on in their careers or experience of treating orthopaedic trauma while practicing in general orthopaedics, taking acute orthopaedic call with inpatient/outpatient or caring for orthopaedic injuries in ER/UC/General Trauma services. ALL levels of experience PAs and NPs are invited to register and attend.

PAs and NPs focused in orthopaedic trauma will find this a good foundation but we also highly recommend attending our other OTA course options of Resident Comprehensive Fracture and Advanced Trauma Courses, Boot Camp, and the Annual Meeting.
