OVERVIEW

The International Trauma Care Forum is focused on gathering trauma surgeons from across the globe together to exchange ideas and knowledge on the differences in treatment from a global perspective. This one and a half day session is comprised of 35 papers and 6 symposia, one of which features presenters from the OTA 2018 Guest Nation, the Netherlands.

Attendees of the International Trauma Care Forum will collaborate with the attendees of the Basic Science Focus Forum and exchange ideas during the symposium titled, “The Science of Bone Grafting.” This combined session has proved to be a great way to come together to discuss ideas with basic science researchers.

TARGET AUDIENCE

The Orthopaedic Trauma Association (OTA) International Orthopaedic Trauma Care Forum is for the benefit of orthopaedic trauma surgeons and related allied health care professionals with an interest in international trauma healthcare.

LEARNING OBJECTIVES

Upon successful completion of this course, participants will be able to:

✓ Discuss surgical techniques of elbow injuries
✓ Understand surgical management of pediatric hip and pelvic fractures
✓ Become familiar with the issues surrounding the treatment of atypical femoral fractures
✓ Appreciate differences in the treatment of distal tibial fractures reconstructed either with ORIF or fine wire fixators (ilizarov)
✓ Become aware of the latest techniques in the management of femoral head fractures
✓ Gain knowledge on the differences of treatment of intertrochanteric fractures from a global perspective
