

RESEARCH PARTICIPANTS NEEDED

For a Survey about:

Best Practices for Managing Fractures in Patients with a Spinal Cord Injury

LOOKING FOR:

- Spinal cord injury (SCI) physicians
- Orthopedic surgeons who have cared for patients with SCI and fractures

PURPOSE:

Osteoporosis-related fractures are frequent in persons with a SCI and are associated with substantial morbidity and increased mortality. However, it is uncertain whether lower extremity fractures in persons with SCI are best managed non-surgically or surgically. The purpose of this survey is to examine provider perceptions concerning the optimal treatment of these patients.

WHAT PARTICIPATION ENTAILS:

- Answering questions about your perspectives on the management of hypothetical cases of fractures in persons with SCI
- Estimated completion time: 20 minutes
- All responses are anonymous
