Precice Bone Transport

The future of limb reconstruction is here.

Due to the limitations of current solutions in the market to treat segmental defects caused by tumors or trauma, the need for a reliable and simple approach is prevalent. The **Precice® Bone Transport** system is the new all-internal solution designed to treat segmental bone defects up to 10cm—delivering strength and stability for better patient satisfaction with this challenging procedure.¹

The Precice Bone Transport system offers:

- A less invasive solution
- Designed for a vast range of defects
- Reduced complexity for the patient and surgeon

David C. Teague, MD

Dear OTA Members, Guests and Associates:

Welcome to Denver and the OTA Annual Meeting 2019. On behalf of the OTA Board of Directors (BOD), we thank you for trusting us with your time, your resources and your scientific energy. We recognize that travel away from your busy work and home necessitates a choice and an endorsement of the meetings you elect to attend. We believe you have chosen well and will gain much from this week's myriad offerings.

Mike Gardner, MD, Annual Meeting Program Chair, and the committee present an amazing array of scientific, instructional and case-based discussion sessions, along with annual favorite and new pre-meeting offerings.

The BOD and the entire OTA welcome our colleagues from Argentina, this year's official guest nation. They graciously hosted small OTA contingents on two occasions over the past year. We look forward to reciprocating their hospitality and know their scientific session on Friday brings much for all of us to learn.

Our annual meeting represents the best of our OTA community. It highlights thoughtful scientific approach and brilliant, committed surgeons. The efforts of hundreds of OTA members and associates, committee members and chairs culminate in this premier annual gathering. The meeting, in turn, propels further inquiry and collaboration. It distinguishes the OTA.

Mike McKee, Heather Vallier, Mike Archdeacon, Bill Ricci and Steve Olson comprise your presidential line. Cliff Jones, Chad Coles and Phil Wolinsky represent you all as At-Large Members of the BOD. Doug Lundy, Thomas Higgins, Mike Gardner and Ted Miclau round out the current BOD roster. You would be proud to hear how actively they advocate for you and the organization in all of our deliberations.

Your Board wishes you a tremendous week. Thank you for joining us in the beautiful Front Range of the Rockies.

Respectfully,

Dave Teague, MD
OTA President

IS07 Nailing Redefined: ADAPT for Gamma3

(302)

Sanjit R. Konda, MD

Learn how ADAPT for Gamma3 is redefining nailing with innovative software based instrumentation. The system uses augmented reality to project 3D-based measurements on patient X-rays. ADAPT's software can eliminate the need for certain hardware instrumentation while enabling surgeons to guide implant alignment, lag screw length determination, lag screw positioning and distal targeting.

IS08 An Innovative Approach to Proximal (303)

Humerus Fracture Repair

Using the PH Cage

Michael Gardner, MD

Dr. Michael Gardner, MD, of Stanford University, will review clinical data, case studies and the surgical technique for the Conventus PH Cage system. Ample time will be allowed for Q&A from participants, as well as time for hands-on review of the PH Cage instrumentation.

IS09 Distal Elbow System: (304)

The Total Solution to Distal Elbow Trauma

Jorge L. Orbay, MD

Review and discuss the kinematics and biomechanics of the forearm, concentrating on the role of soft tissue structures and how they affect forearm and elbow function. During this session, we will feature the IJS Elbow stabilization system which provides temporary subcutaneous stability between the distal humerus and proximal ulna in patients who have elbow instability allowing for early active mobilization and function of the elbow.

IS13 The New Precice Bone Transport Nail - Early Clinical Results and Technology Review

(404)

Introducing the new all-internal Precice® Bone Transport System, the latest advancement from NuVasive Specialized Orthopedics, Inc, designed to treat segmental bone defects up to 10cm. Due to the limitations of current solutions in the market, the need for a reliable and simple approach for bone transport procedures is prevalent. The Precice® Bone Transport nail delivers strength and stability for better patient satisfaction with this challenging procedure. Our surgeon faculty will share their early clinical results with the Precice Bone Transport Nail and their experience into how this new nail is changing their treatment algorithm for their patients with complex and challenging segmental bone loss. Time will be set aside for questions and answers at the end of the session.

IS14 SI-BONE: Trauma in the SI Joint, Didactic and Hands-On Lab

(405)

IS15 Arthrex Innovations in Orthopedic Trauma

(503)

*John D. Adams, MD; Mark Gage, MD;
John Riehl, MD; Edward Westrick, MD;
Richard S. Yoon, MD*

Arthrex invites you to interact with world-renown surgeons discussing the most innovative, safe and reproducible techniques in Orthopedic Trauma. This session will focus on innovative minimally invasive solutions in trauma surgery followed by a hands-on experience demonstrating some of the latest advancements in treating the traumatic patient.

**IS16 Asset Protection, Tax Reduction,
Lawsuit Prevention
& License Protection**

(504)

Learn how to structure your practice for lawsuit protection and prevention, how to protect your professional and personal assets from lawsuits, reduce your malpractice insurance costs, how to protect your retirement plans from judgments and seizures, and how to minimize vicarious liability for the acts of other professionals and staff.

OBJECTIVES:

Upon completion of this presentation, the attendees will know how to:

1. Maintain the focus of their medical practice on improved patient care rather than malpractice defense.
2. Structure their practices for lawsuit protection and prevention, improving overall operations management of the practice.
3. Protect practice and professional assets from lawsuits through applied risk management techniques, improving and enhancing fiscal efficiency.
4. Understand basic practice management tools that can help increase practice revenue as well as decrease unnecessary loss of revenue also improving and enhancing fiscal efficiency.
