

SESSION NUMBER	TITLE	FACULTY	DESCRIPTION
WEDNESDAY 6:30 – 8:00 PM	IS01  skeletal[®] dynamics <small>Innovation Based on Science</small> (Room 114)	<i>Jorge L. Orbay, MD</i> Advancements in the Treatment of Distal Elbow Fracture-Dislocations	
	IS02  INTEGRA <small>LIMIT UNCERTAINTY</small> (Room 113)	Get Some Closure: The Latest in Soft Tissue Solutions	
	IS03 stryker (The Ashton Depot) 6:00 - 9:00 PM	The Stryker Experience Event *Dinner will be provided throughout the event.	
THURSDAY 11:15 AM – 12:45 PM	IS05 Smith+Nephew (Room 103AB)	<i>J. Tracy Watson, MD (Moderator); Samir Mehta, MD</i> Current Concepts of Periprosthetic Fractures	This educational session will be driven by interactive case reviews and panel discussions. Participants will be actively engaged for their clinical experiences and perspective. Topics will include various periprosthetic fractures.
	IS06  DePuy Synthes <small>THE ORTHOPAEDICS COMPANY OF Johnson & Johnson</small> (Room 121C)	<i>Frank Liporace MD; Cory Collinge MD; George Haidukewych, MD</i> Expanding Fixation Options for Periprosthetic Fractures	Hear from our surgeon faculty on upcoming advancements in periprosthetic fracture treatment to overcome common clinical complications, including: limited options for fixation, soft tissue complications, and risk for fracture in the distal femur.
	IS07  DePuy Synthes <small>THE ORTHOPAEDICS COMPANY OF Johnson & Johnson</small> (Room 121D)	<i>Thomas Higgins, MD; Christopher Finkemeier, MD</i> Improving Stability in Femur and Tibia Fractures with the Advanced Nailing System	Join us to learn how our surgeon partners are utilizing the new Advanced Nailing System (Retrograde Femoral Nail Advanced & Tibial Nail Advanced) to address the clinical challenges associated with instability in fractures of the distal femur and proximal tibia.

SESSION NUMBER	TITLE	FACULTY	DESCRIPTION
IS08  THE ORTHOPAEDICS COMPANY OF Johnson & Johnson (Room 121E)	The Latest in Clavicle Fractures: Innovations in Plate Design, Clinical Approaches, and Technique Tips	<i>Harry Hoyen, MD;</i> <i>Eben Carroll, MD</i>	Learn how we were able to correlate patient height to clavicle shape and how this subsequently allowed us to design thinner, less prominent, and better fitting clavicle plates.
IS09  ZIMMER BIOMET Moving You Forward. [™] (Room 108)	Solutions to Peri-Prosthetic and Challenging Distal Femoral Fractures	<i>Michel Tilley, MD</i> <i>Ravi Karia, MD</i>	In this session, Dr. Karia & Dr. Tilley will explore the unique challenges of and treatment solutions for addressing distal femoral and peri-prosthetic fractures.
IS10  (Room 114)	Treating Distal and Diaphyseal Femur Fractures Featuring Stryker's New T2 Alpha Femur Retrograde Nailing System	Joshua Langford, MD Orlando, FL Robert Wetzel, MD Cleveland, OH	This session will feature engaging case reviews by our surgeon partners and an educational overview on Stryker's newest nailing technology.
IS11  skeletal [®] dynamics Innovation Based on Science (Room 121B)	The Next Generation of Distal Humerus and Humeral Shaft Fracture Management	<i>Jorge L. Orbay, MD</i>	
IS12  (Room 106)	Now Launching The iFuse-TORQ Implant System for Pelvic Trauma!	<i>Michael Gardner, MD</i> <i>(Stanford)</i> <i>Bharat Desai, MD</i> <i>(Golden, CO)</i> <i>Craig Bartlett, MD</i> <i>(University of Vermont)</i>	Just cleared by the FDA, iFuse-TORQ is a 3D printed, threaded implant designed with cutting-edge features to optimize system performance in pelvic fracture repair and sacroiliac joint fusion surgery. Case examples and preliminary outcomes will be shared.
IS13  (Room 121A)	Reducing the Risk in Surgical Site Infections in Lower Extremity Surgery	<i>Brett Crist, MD, FACS,</i> <i>FAAOS</i> <i>Animesh Agarwal, MD</i>	
IS14  NUVASIVE Specialized Orthopedics (Room 113)	Early Clinical Results: Treating Segmental Bone Defects with the Precice Bone Transport System	<i>James Blair, MD</i> <i>Matthew Gardner, MD</i> <i>Stephen Quinnan, MD</i> <i>John Scolaro, MD</i>	

THURSDAY 11:15 AM - 12:45 PM
