

# Pelvic and Acetabular Anatomy

*Alesha N. Scott, DO, FAAOS*

*Medical Director of Orthopedic Trauma*

*Bryan Health*

# Pelvic Ring Anatomy

- Learn the anatomy of the pelvis and acetabulum
  - Osteology
  - Ligamentous
  - Muscular
  - Neurovascular
- Differentiate the palpable landmarks

# Pelvic Ring Anatomy

- Osteology
- Ligamentous
- Muscular
- Neurovascular

# Pelvic Osteology

3 bones

- Innominate bones x2
- Sacrum

# Pelvic Osteology

## Innominate Bone

- Ilium
- Pubis
  - Pubic root
  - Pubic body
  - Pubic tubercle
- Ischium

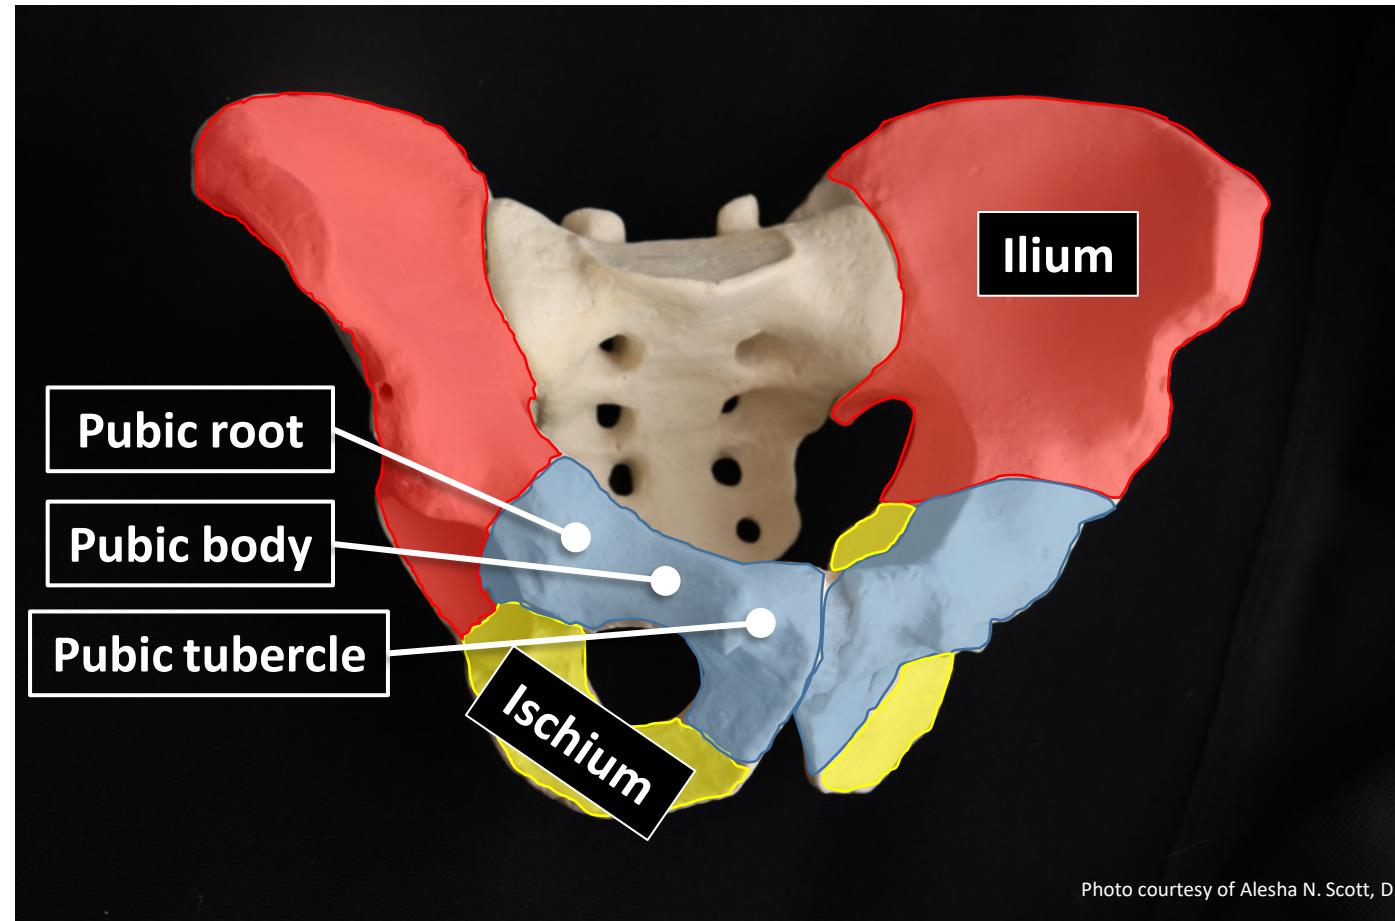

Photo courtesy of Alesha N. Scott, D

# Pelvic Osteology

## Palpable Anterior Landmarks

- Iliac crest
- Anterior superior iliac spine (ASIS)
- Anterior inferior iliac spine (AIIS)
- Pubic tubercle

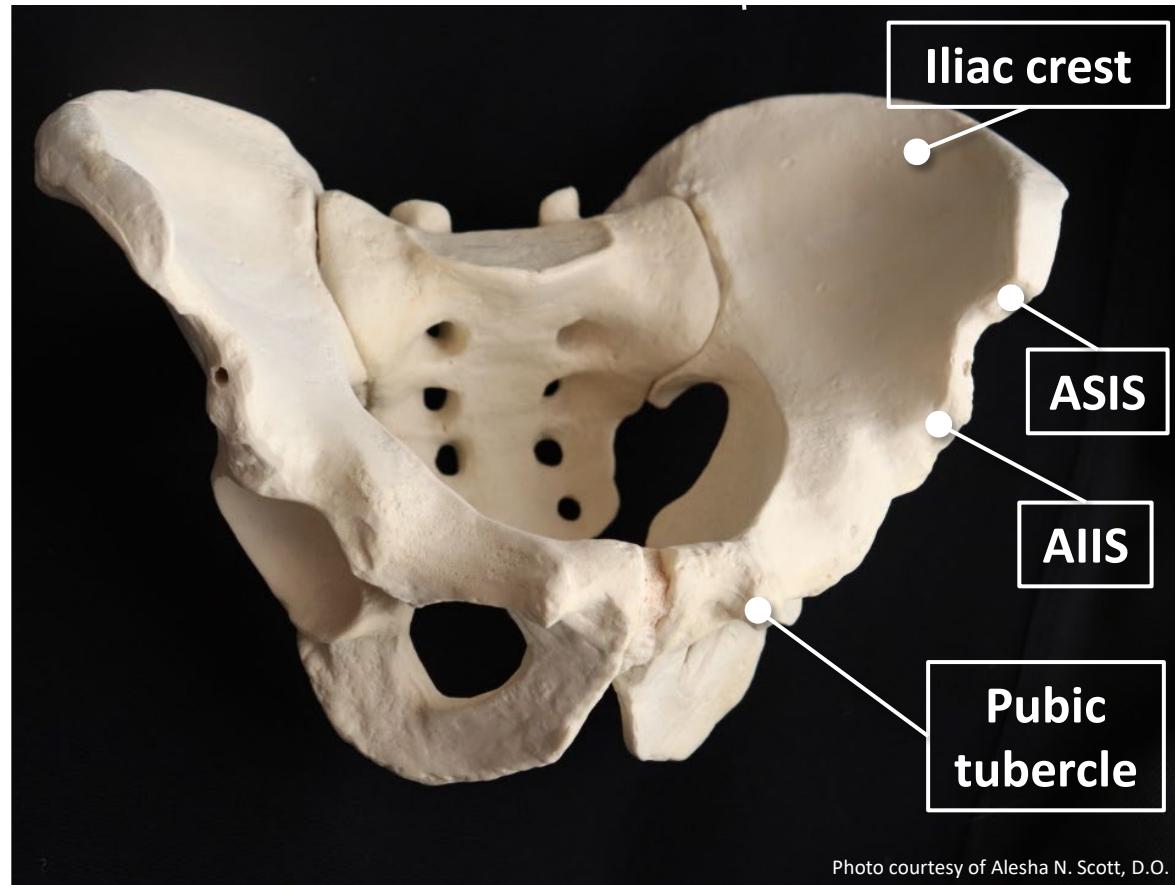

Photo courtesy of Alesha N. Scott, D.O.

# Pelvic Osteology

## Palpable Posterior Landmarks

- Iliac crest
- Posterior superior iliac spine (PSIS)
- Ischial tuberosity

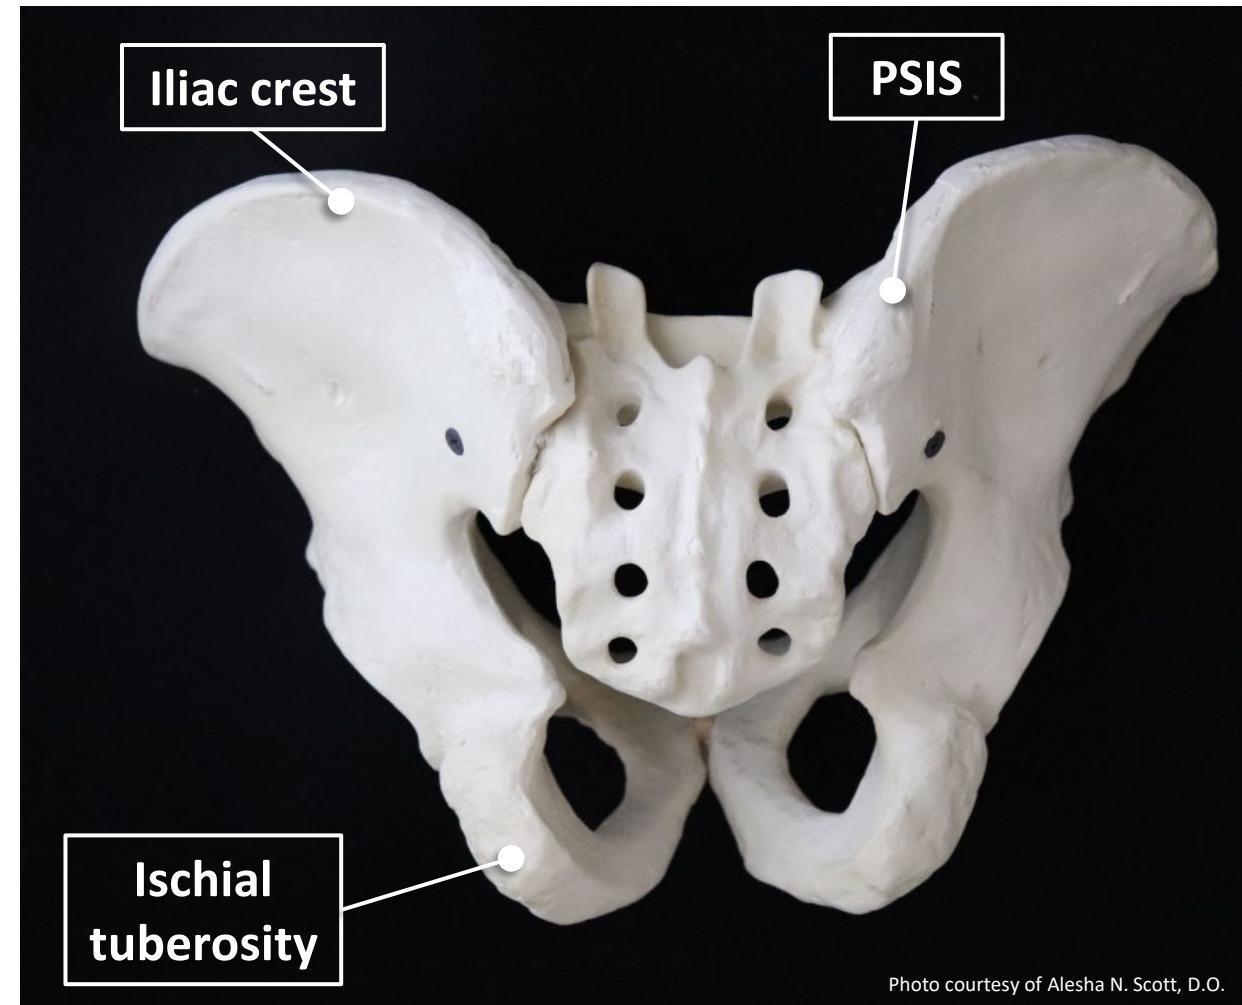

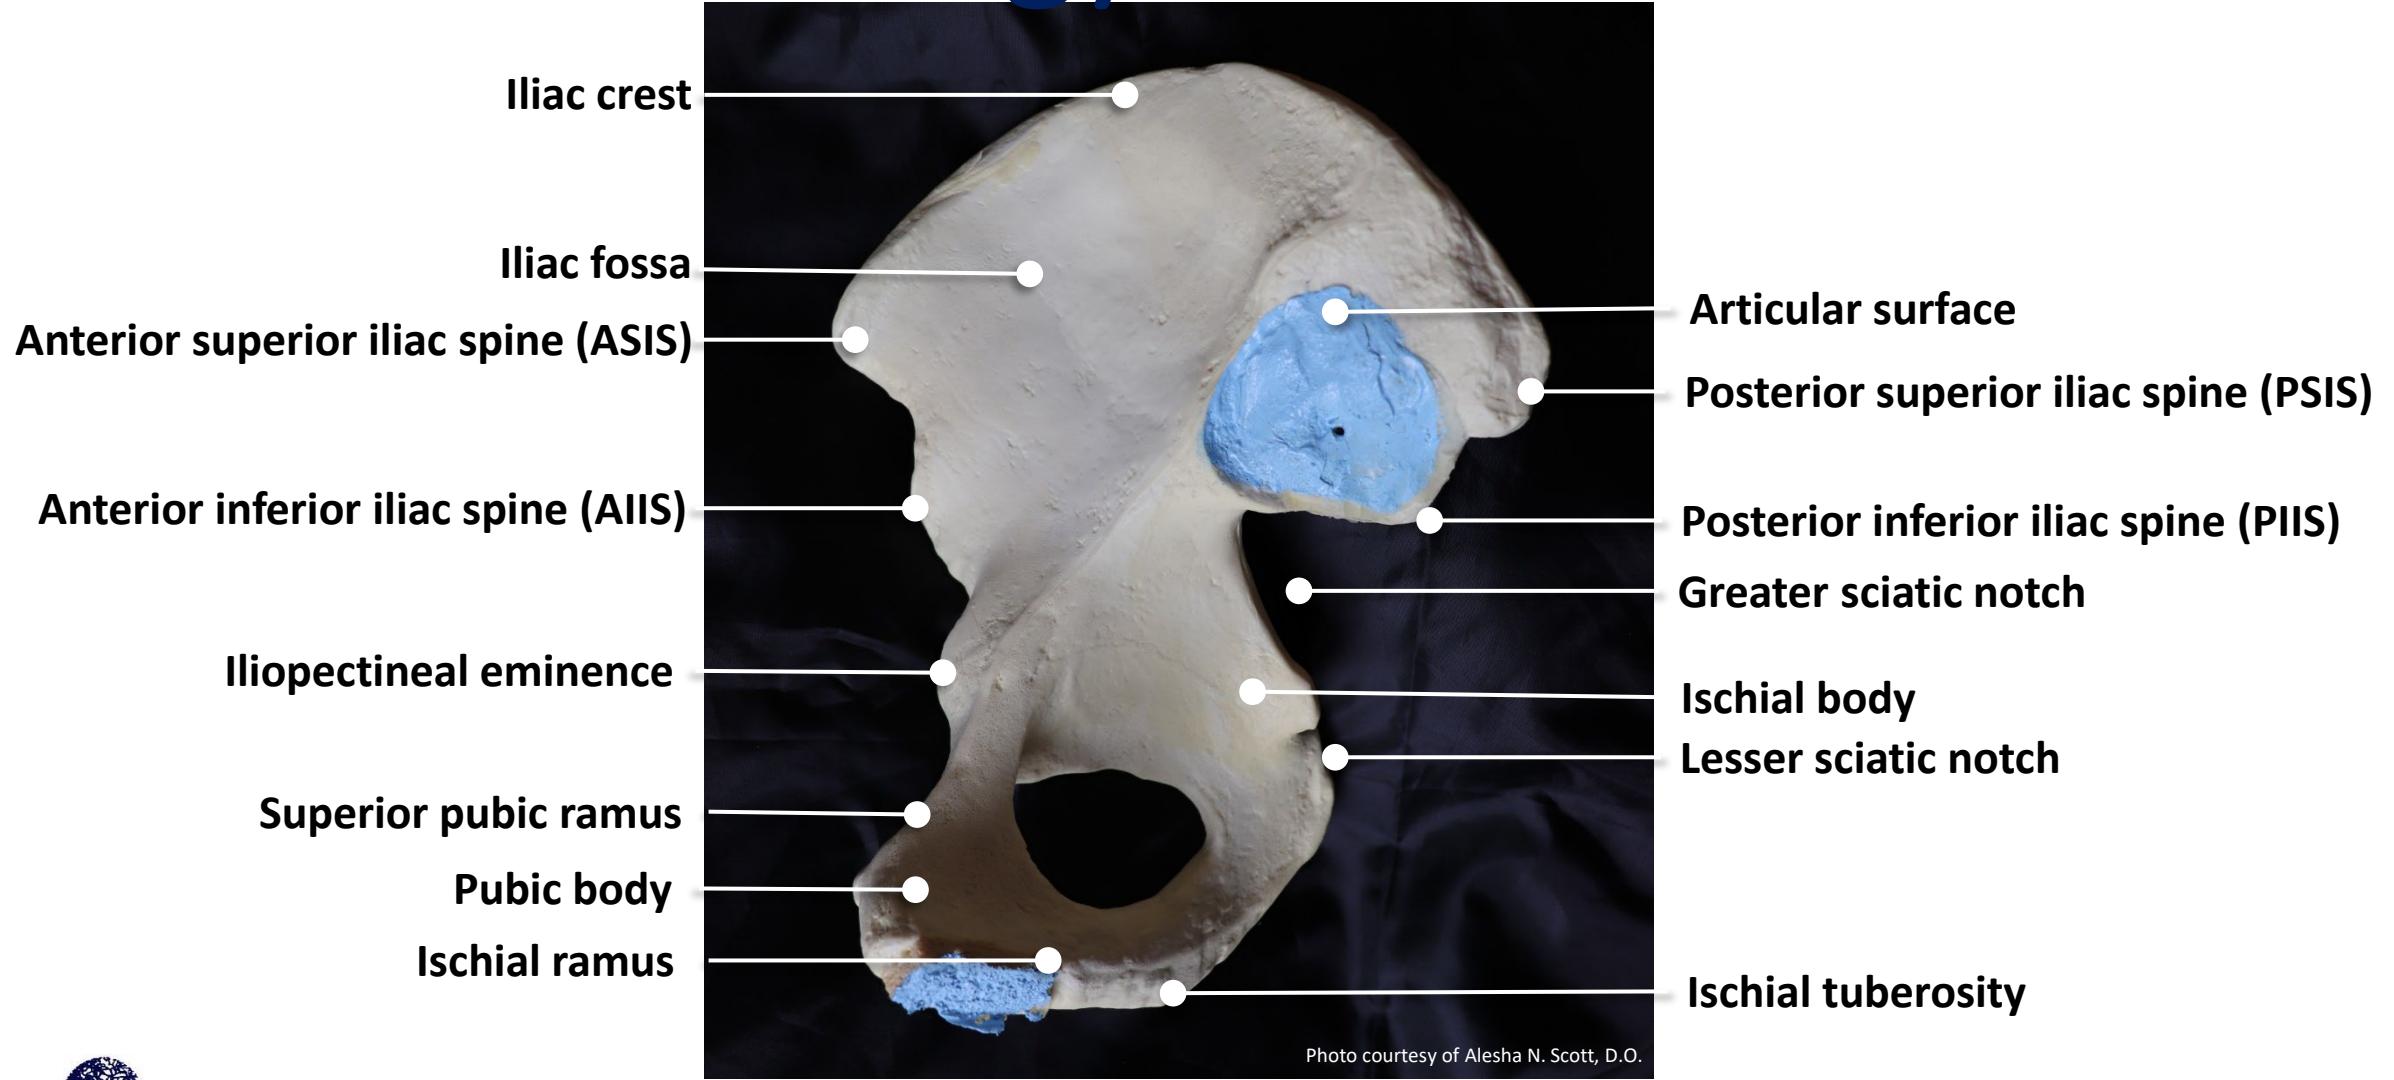

Photo courtesy of Alesha N. Scott, D.O.

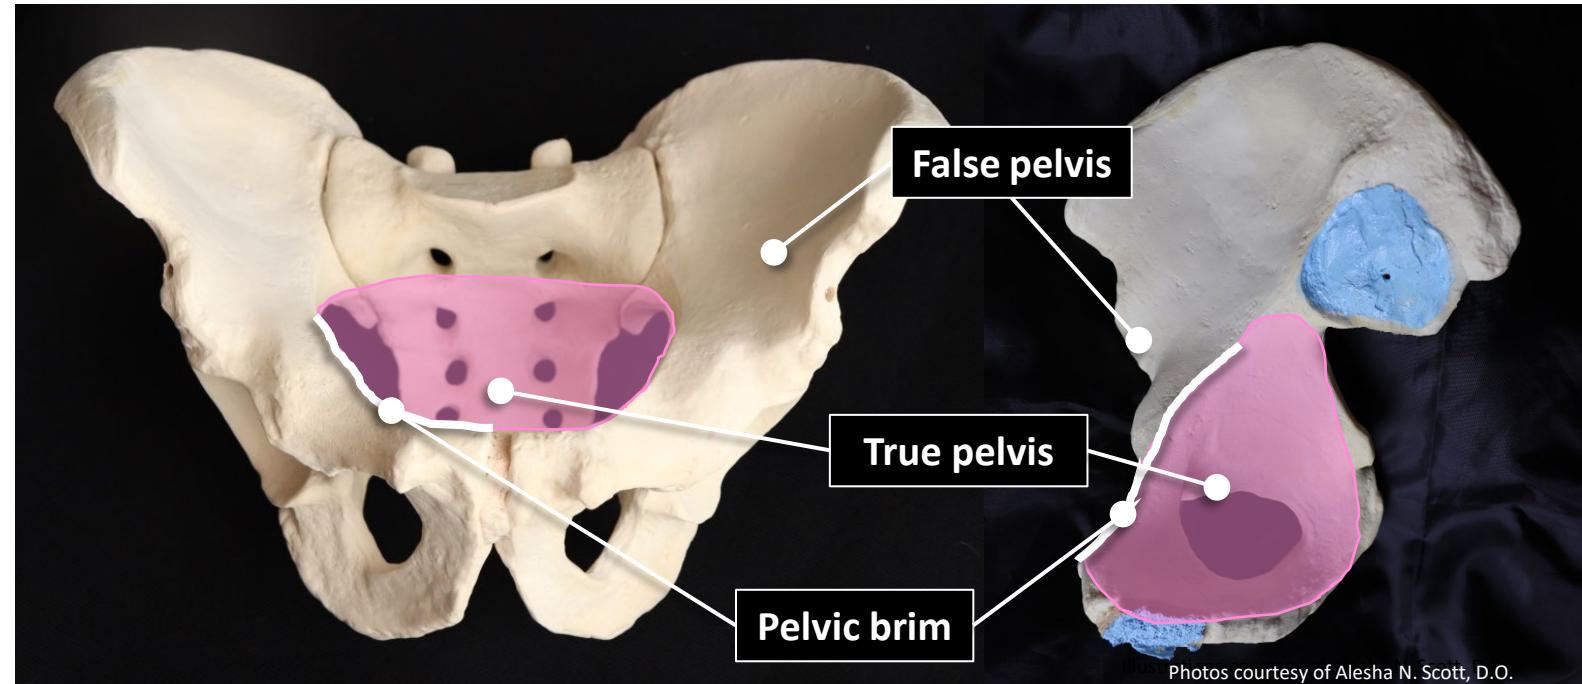

# Pelvic Osteology

# Pelvic Osteology

## False and True Pelvis

- False pelvis
  - Cranial to the pelvic brim
  - Sacral ala + iliac fossae
- True pelvis
  - Caudal to the pelvic brim

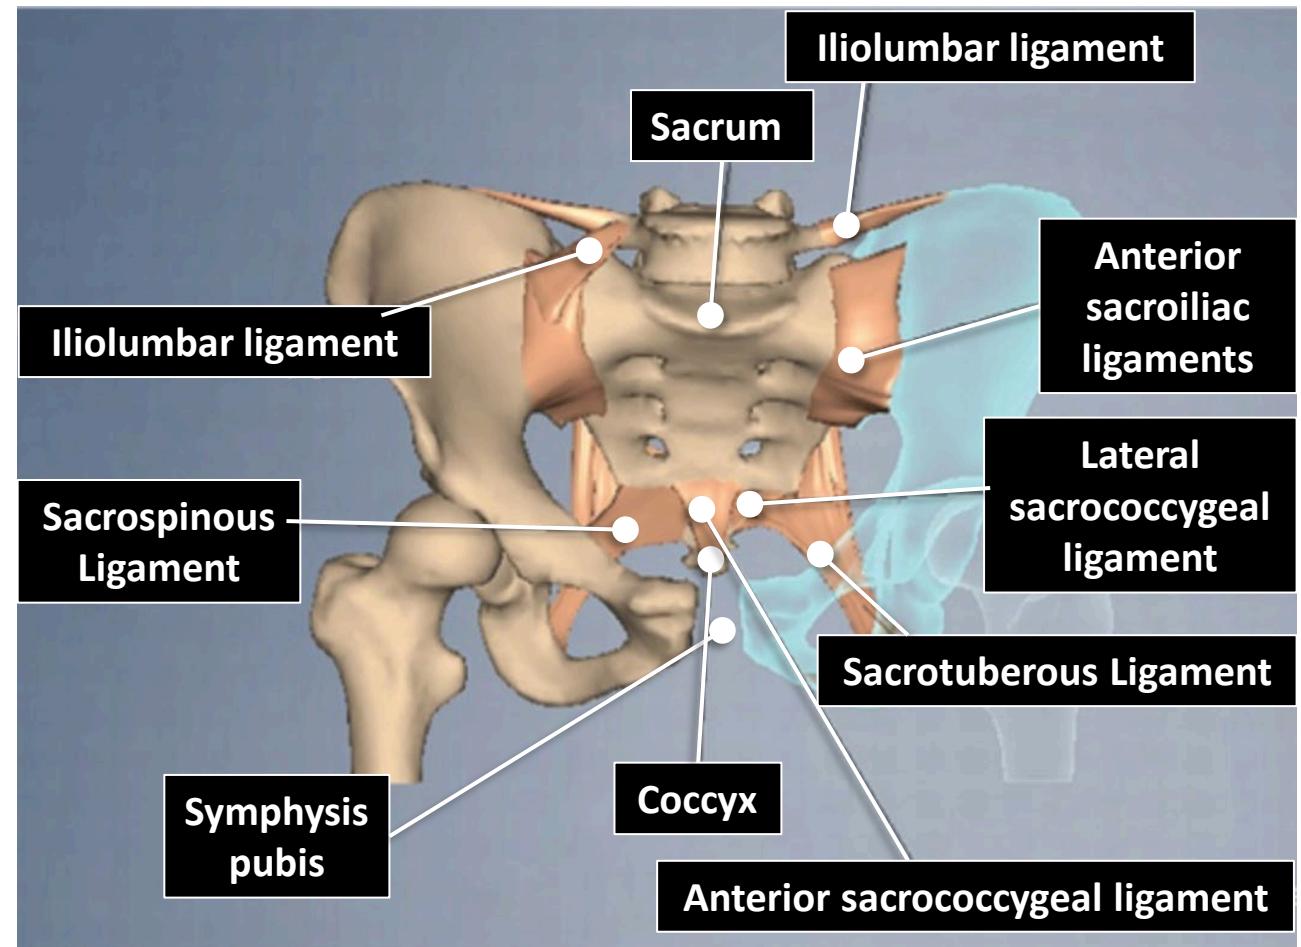

# Ligamentous Pelvic Anatomy

# Ligamentous pelvic anatomy

- Anterior
  - Symphysis pubis (+superior/inferior pubic ligaments)
  - Inguinal ligament
- Posterior
  - Anterior aspect
    - Anterior sacroiliac ligaments
    - Iliolumbar ligament
  - Posterior aspect: strongest
    - Posterior (dorsal) sacroiliac ligaments
    - Interosseous sacroiliac ligaments
    - Iliolumbar ligament
- Pelvic floor
  - Sacrospinous ligament
  - Sacrotuberous ligament

# Ligamentous Pelvic Anatomy

## Anterior ligaments

- Symphysis pubis: fibrocartilage
- Superior pubic ligament
- Inferior pubic ligament (arcuate ligament)
- Inguinal ligament

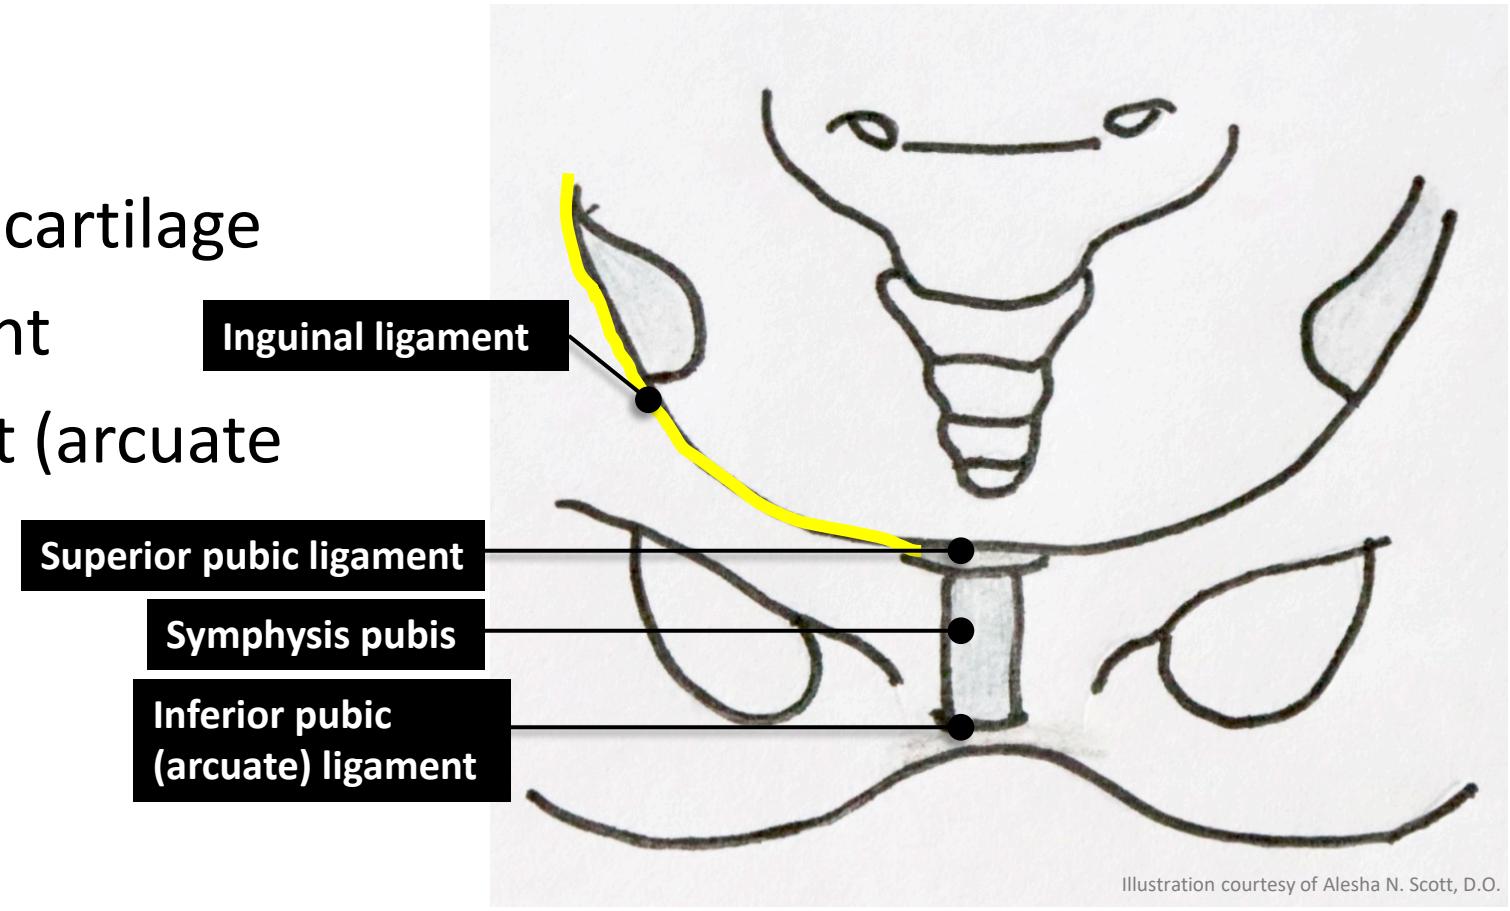

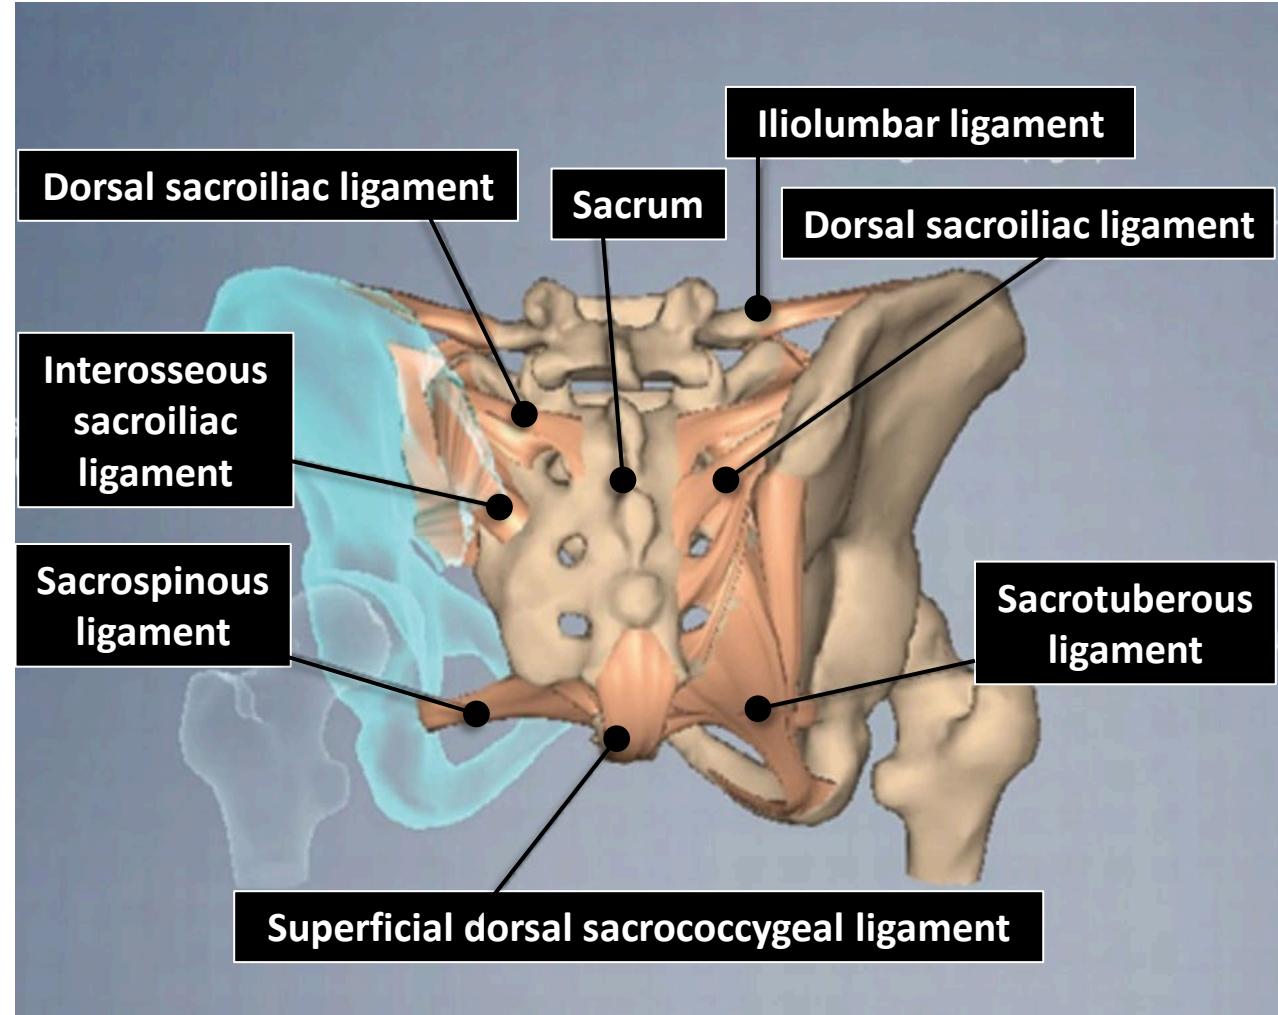

Illustration courtesy of Alesha N. Scott, D.O.

# Ligamentous Pelvic Anatomy

- Anterior
  - Symphysis pubis (+superior/inferior pubic ligaments)
  - Inguinal ligament
- Posterior
  - Anterior aspect
    - Anterior sacroiliac ligaments
    - Iliolumbar ligament
  - Posterior aspect: strongest
    - Posterior (dorsal) sacroiliac ligaments
    - Interosseous sacroiliac ligaments
    - Iliolumbar ligament
- Pelvic floor
  - Sacrospinous ligament
  - Sacrotuberous ligament

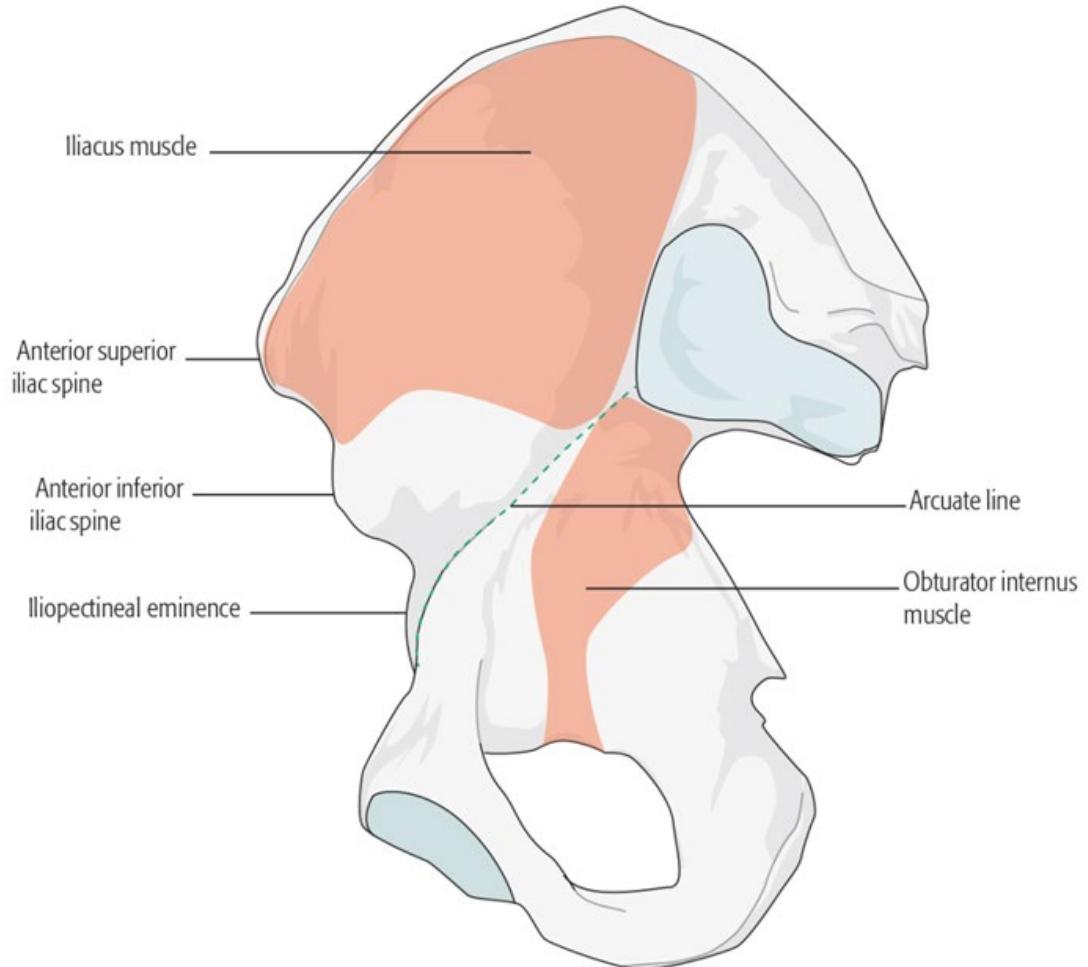

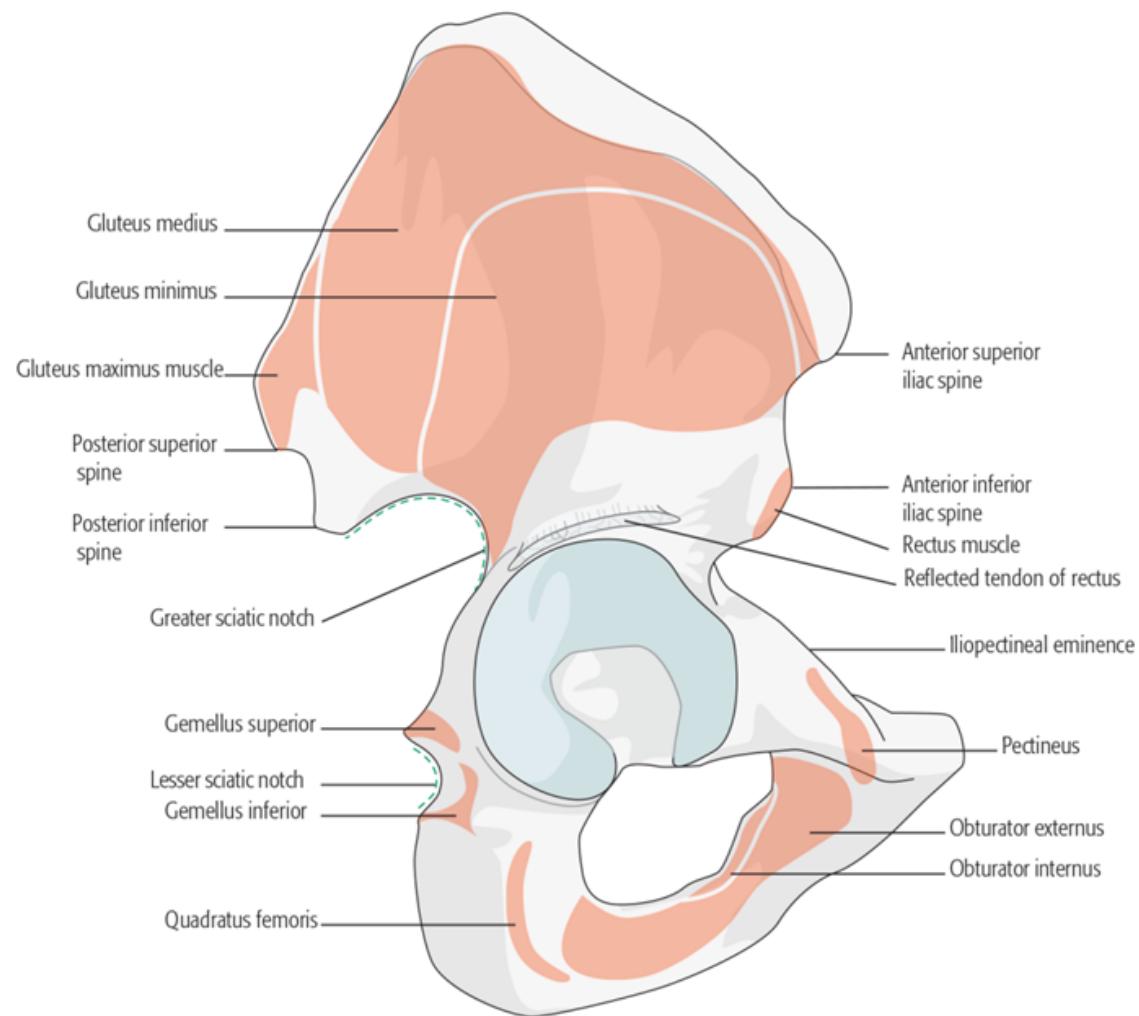

# Ligamentous Pelvic Anatomy

| Ligaments                    | Functions                                       |
|------------------------------|---|
| • Anterior SI ligaments      | → Resist external rotation                      |
| • Posterior SI ligament      | → Resist cranial-caudal translation             |
| • Dorsal sacroiliac ligament | → Resist A-P translation                        |
| • Iliolumbar ligament        | → Resist rotation                               |
| • Sacrospinous ligament      | → Resist external rotation                      |
| • Sacrotuberous ligament     | → Resist cranial-caudal translation and flexion |

# Muscular Pelvic Anatomy

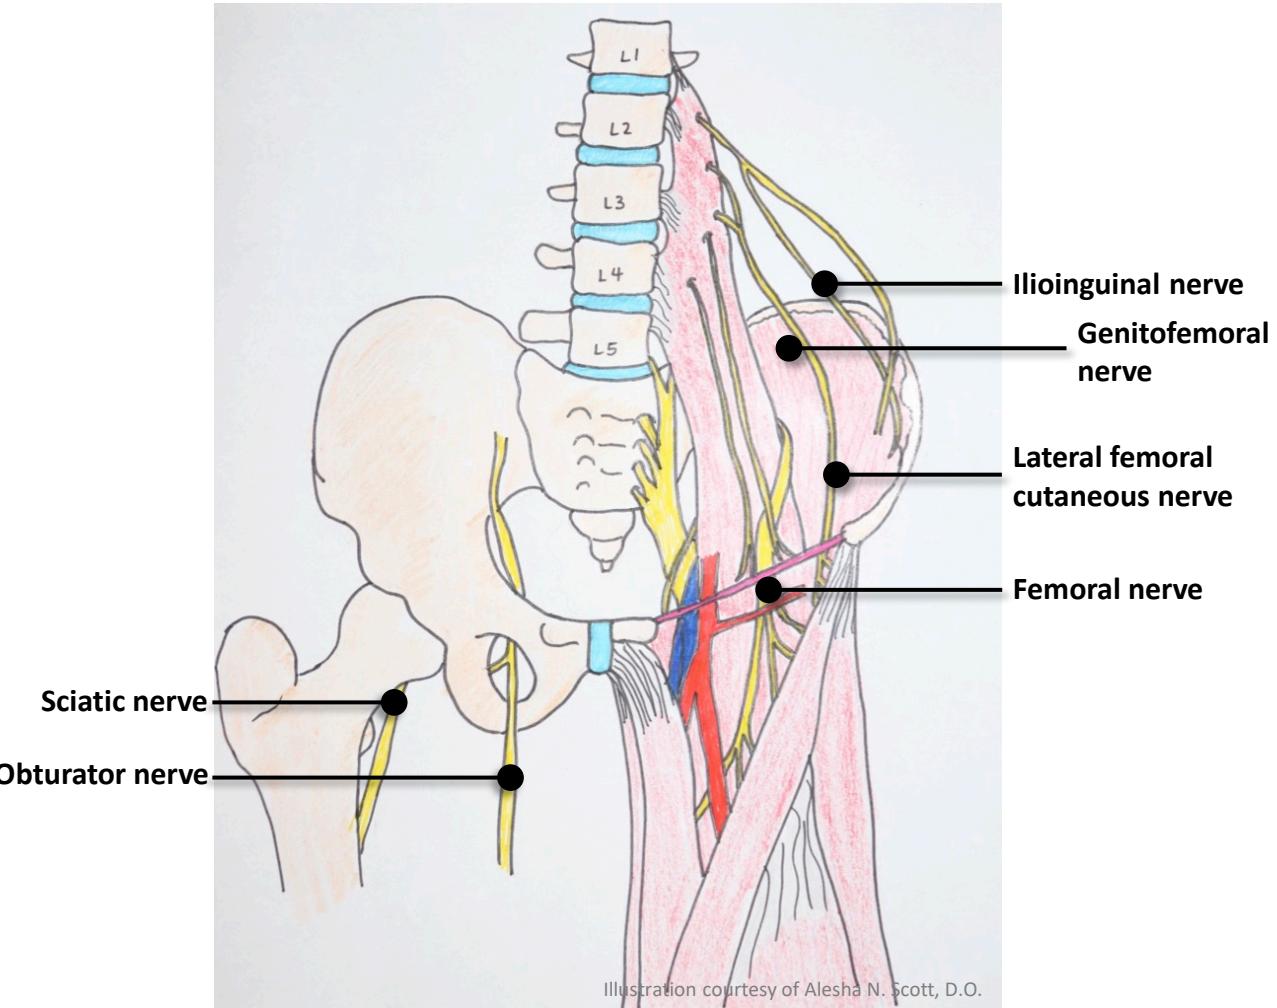

# Muscular Pelvic Anatomy

# Neurovascular Pelvic Anatomy

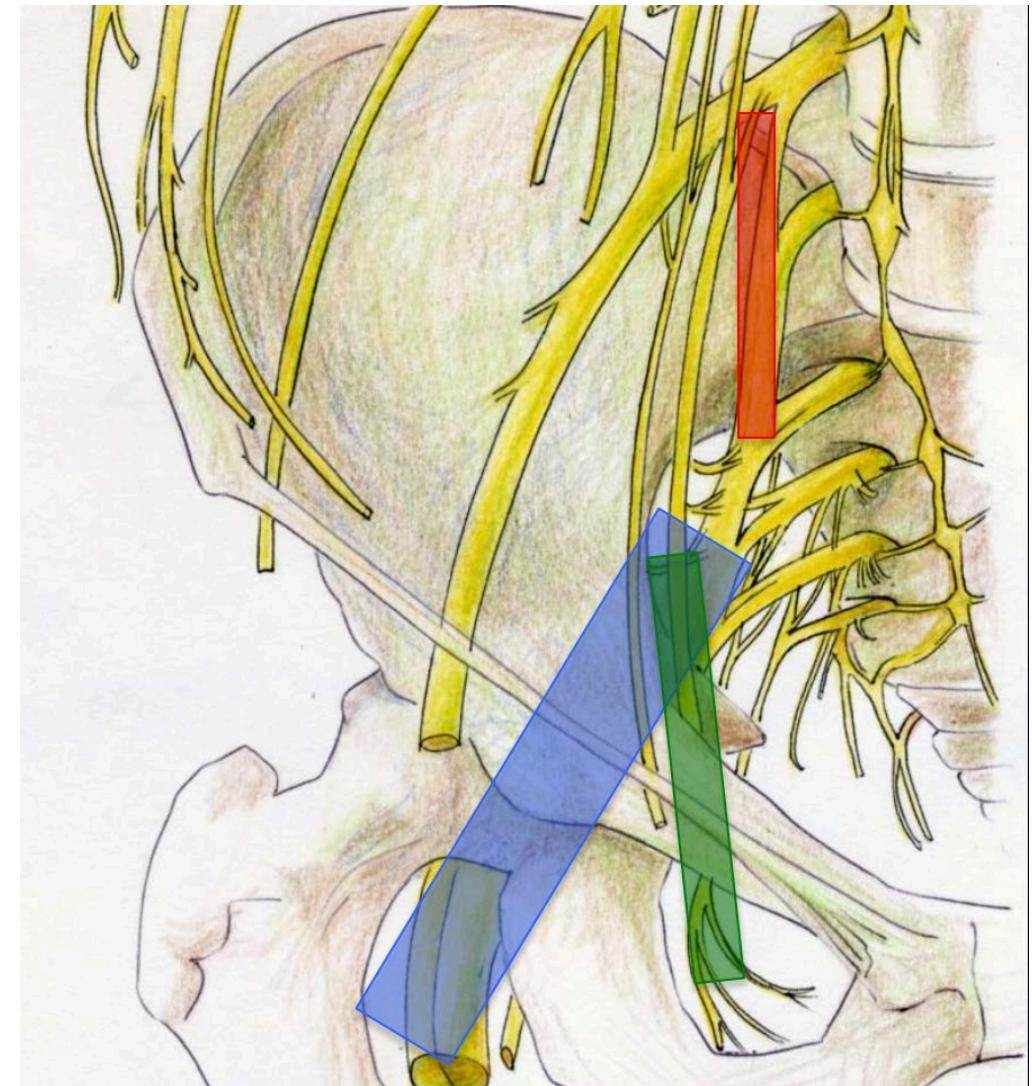

# Neural Pelvic Anatomy

- Lumbosacral plexus
  - Iliohypogastric n. (T12-L1)
  - Ilioinguinal n. (L1)
  - Genitofemoral n. (L1-2)
  - Lateral femoral cutaneous n. (L2-3)
  - Femoral n. (L2-4)
  - Obturator n. (L2-4)
  - Lumbosacral trunk
  - Superior gluteal n. (L4-S1)
  - Inferior gluteal n. (L5-S2)
  - Posterior femoral cutaneous n. (S1-3)
  - Pudendal n. (S2-4)
  - Sciatic n. (L4-S3)
    - Peroneal division
    - Tibial division

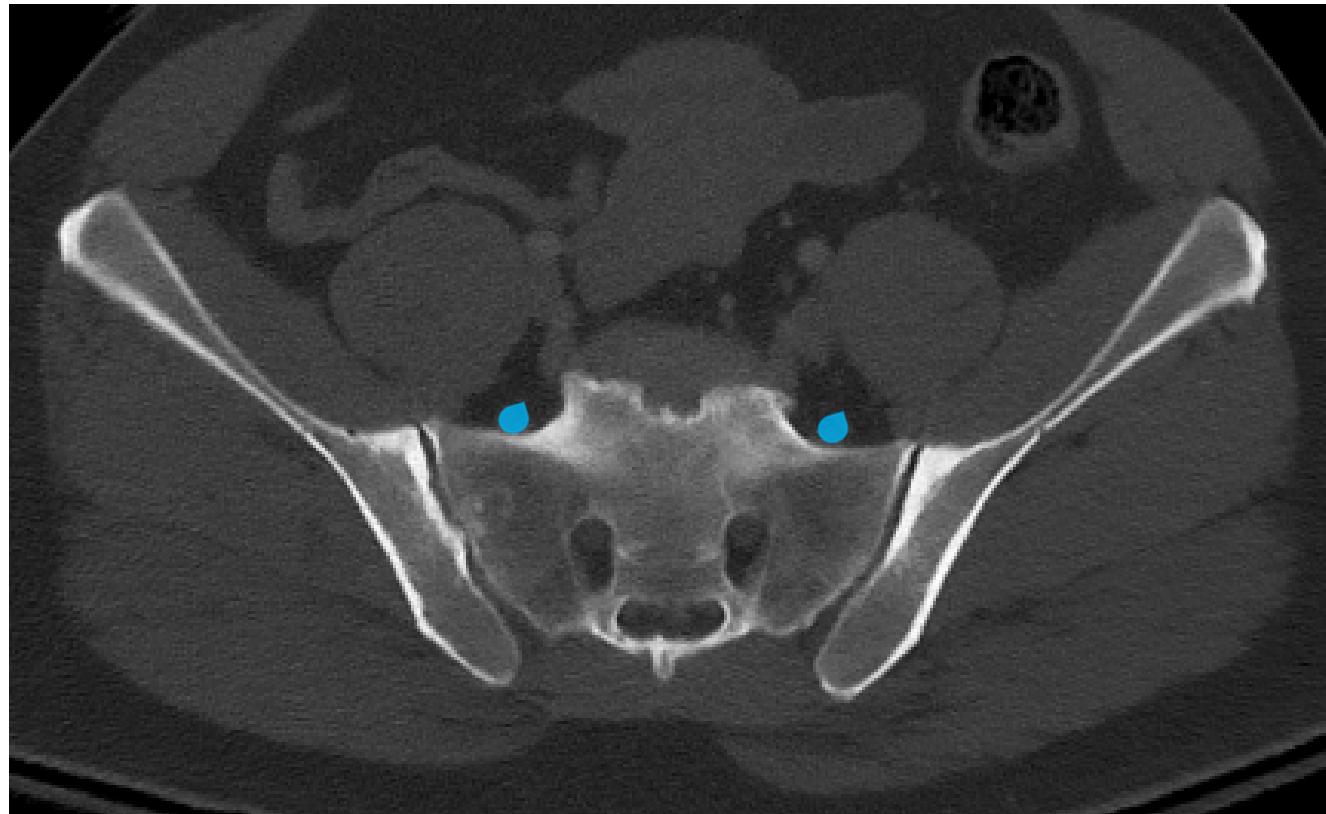

# Neural Pelvic Anatomy

- L4/L5 nerve roots
  - Courses over anterior sacrum
- Sciatic Nerve
  - Exits through greater sciatic notch
- Obturator nerve
  - Exits out lateral aspect of obturator foramen

# Neural Pelvic Anatomy

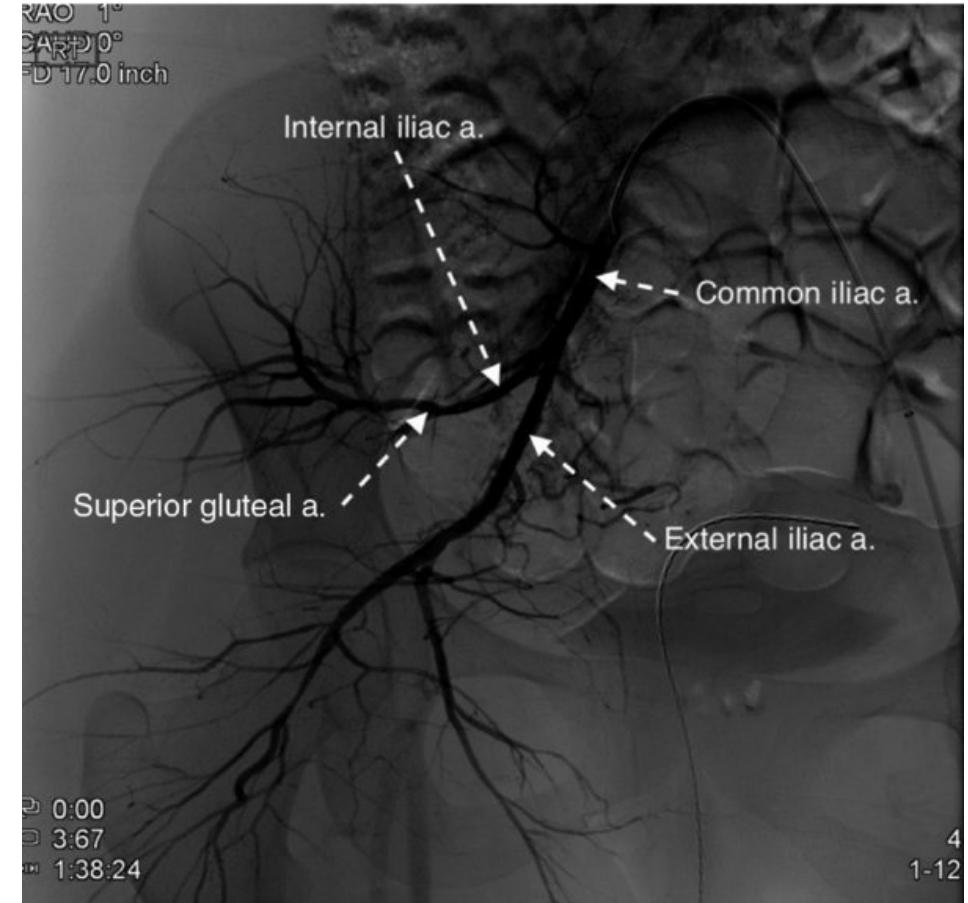

- L5 nerve root at risk with percutaneous iliosacral screw placement
  - 2cm medial to the SI joint

# Vascular Pelvic Anatomy

## Common iliac system

- External iliac artery
- Internal iliac artery
  - Courses medial to vein and splints into anterior and posterior branches
    - Posterior branch most likely injured
- Sacral venous plexus
  - Majority of the hemorrhage following pelvic ring injuries
  - Close the potential space and allow for tamponade by using a pelvic binder/sheet  
→decreases the volume of the pelvic bowl
    - Center sheet/binder on greater trochanters

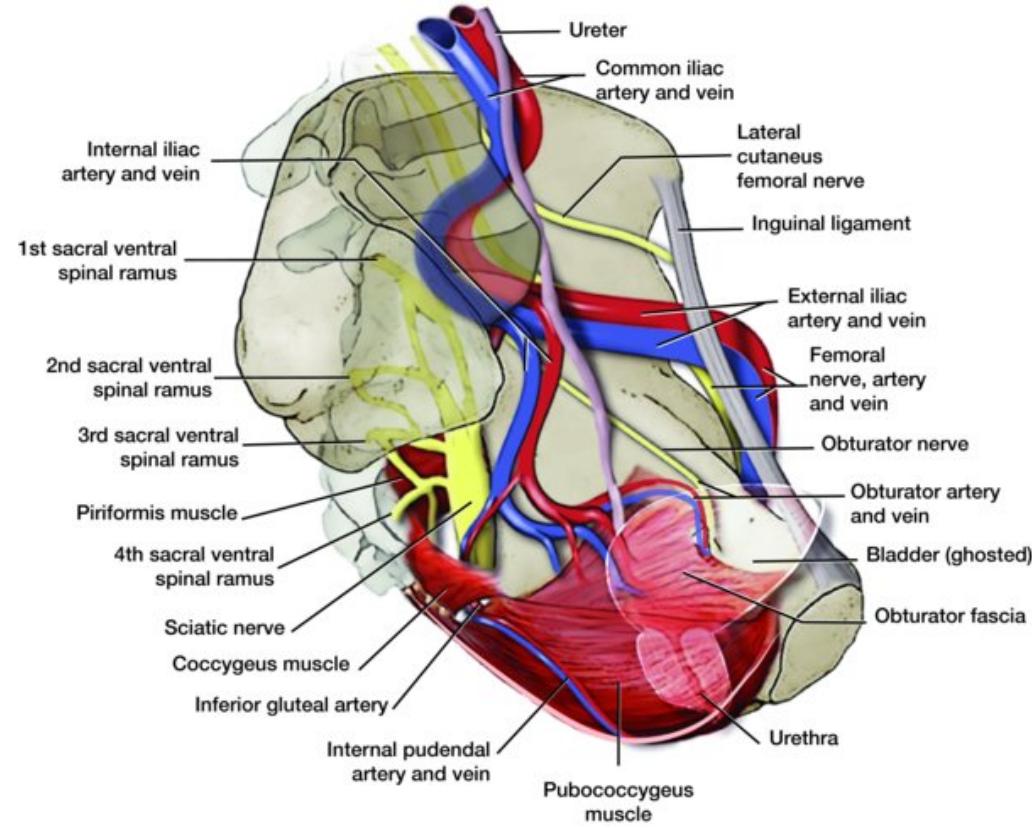

Animesh Agarwal. Pelvic Ring Injuries. In: Tornetta P, Ricci WM, eds. Rockwood and Green's Fractures in Adults, 9e. Philadelphia, PA: Wolters Kluwer Health, Inc; 2019. Figure 49-28.

# Vascular Pelvic Anatomy

## Internal iliac system

- Anterior division
  - Visceral branches
    - Obturator a.
    - Inferior vesical a.
    - Middle rectal a.
- Posterior division
  - Superior gluteal a.
  - Iliolumbar a.
- Limb/perineal branches
  - Inferior gluteal a.
  - Internal pudendal a.

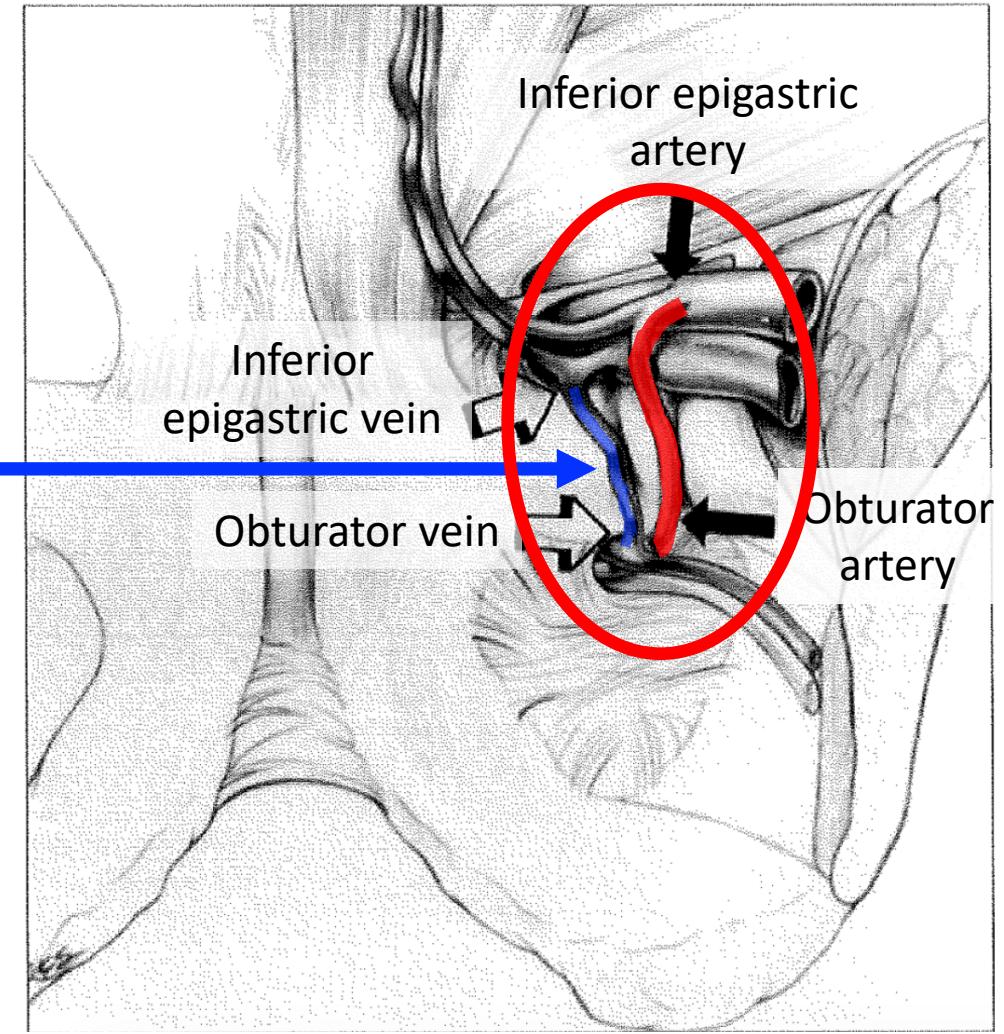

Animesh Agarwal. Pelvic Ring Injuries. In: Tornetta P, Ricci WM, eds. Rockwood and Green's Fractures in Adults, 9e. Philadelphia, PA: Wolters Kluwer Health, Inc; 2019. Figure 49-27.

# Vascular Pelvic Anatomy

## Retropubic anatomy

- Small caliber anastomosis between obturator and external iliac/inferior epigastric systems are common (~70%)
  - Average of 6.2cm lateral to the symphysis
- In small percentage, obturator artery can be of large caliber and originate from inferior epigastric or external iliac
  - **“Corona mortis”**

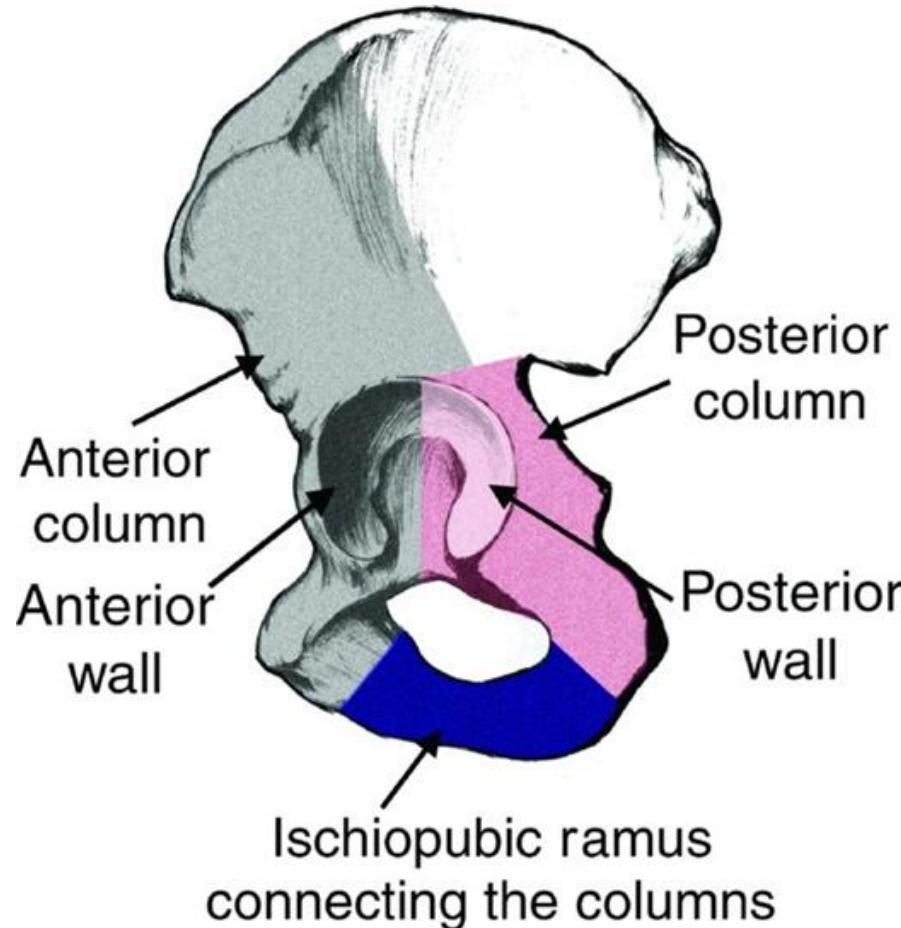

Teague DC, Graney DO, Routt ML Jr. Retropubic vascular hazards of the ilioinguinal exposure: a cadaveric and clinical study. J Orthop Trauma. 1996;10(3):156-9. Figure 1.

# Acetabular Anatomy

- Osteology
- Ligamentous
- Neurovascular

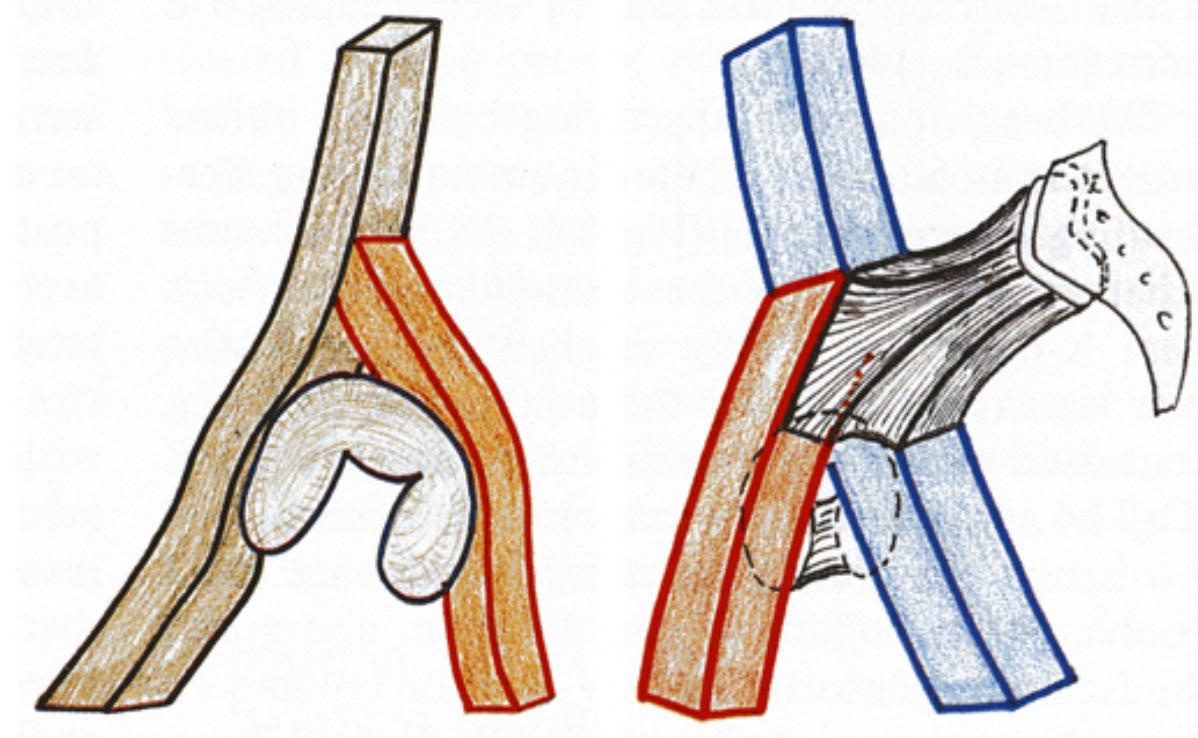

# Acetabular Osteology

Berton R. Moed and John A Boudreau. Acetabulum Fractures. In: Tornetta P, Ricci WM, eds. Rockwood and Green's Fractures in Adults, 9e. Philadelphia, PA: Wolters Kluwer Health, Inc; 2019. Figure 50-8.

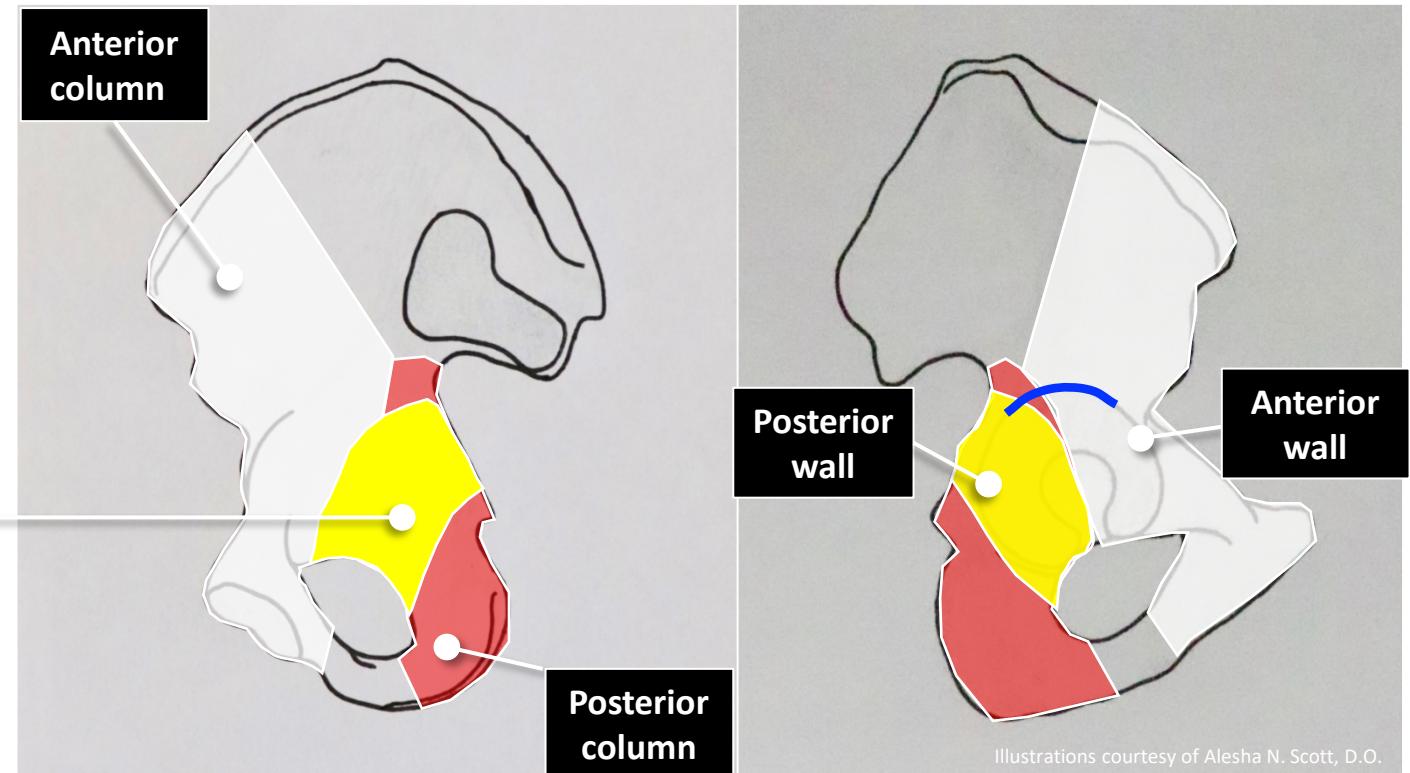

# Acetabular Osteology

- Inverted “Y” two column concept
  - Described by Judet and Letournel (1966)
  - Columns connected to SI joint by thick area of bone above sciatic notch (sciatic buttress)
  - Anatomical roof of acetabulum forms keystone of arch

# Acetabular Osteology

- Columns
  - Anterior
  - Posterior
- Walls
  - Anterior
  - Posterior
- Quadrilateral surface/medial wall
- Dome

Illustrations courtesy of Alesha N. Scott, D.O.

# Acetabular Osteology

## Anterior column

- Extends from anterior iliac crest to pubic symphysis
- 3 segments
  - Iliac segment
  - Acetabular segment
  - Pubic segment

Photo courtesy of Alesha N. Scott, D.O.

# Acetabular Osteology

## Posterior column

- Extends from greater sciatic notch to inferior ischium
- 2 segments
  - Posteroinferior portion of ilium
    - Greater and lesser sciatic notches
  - Ischium

Photo courtesy of Alesha N. Scott, D.O.

Photo courtesy of Alesha N. Scott, D.O.

# Acetabular Osteology

## Anterior wall

- Iliopectineal eminence
  - Represents the anterior and medial boundary of the acetabulum
  - Iliopsoas runs just lateral to the eminence

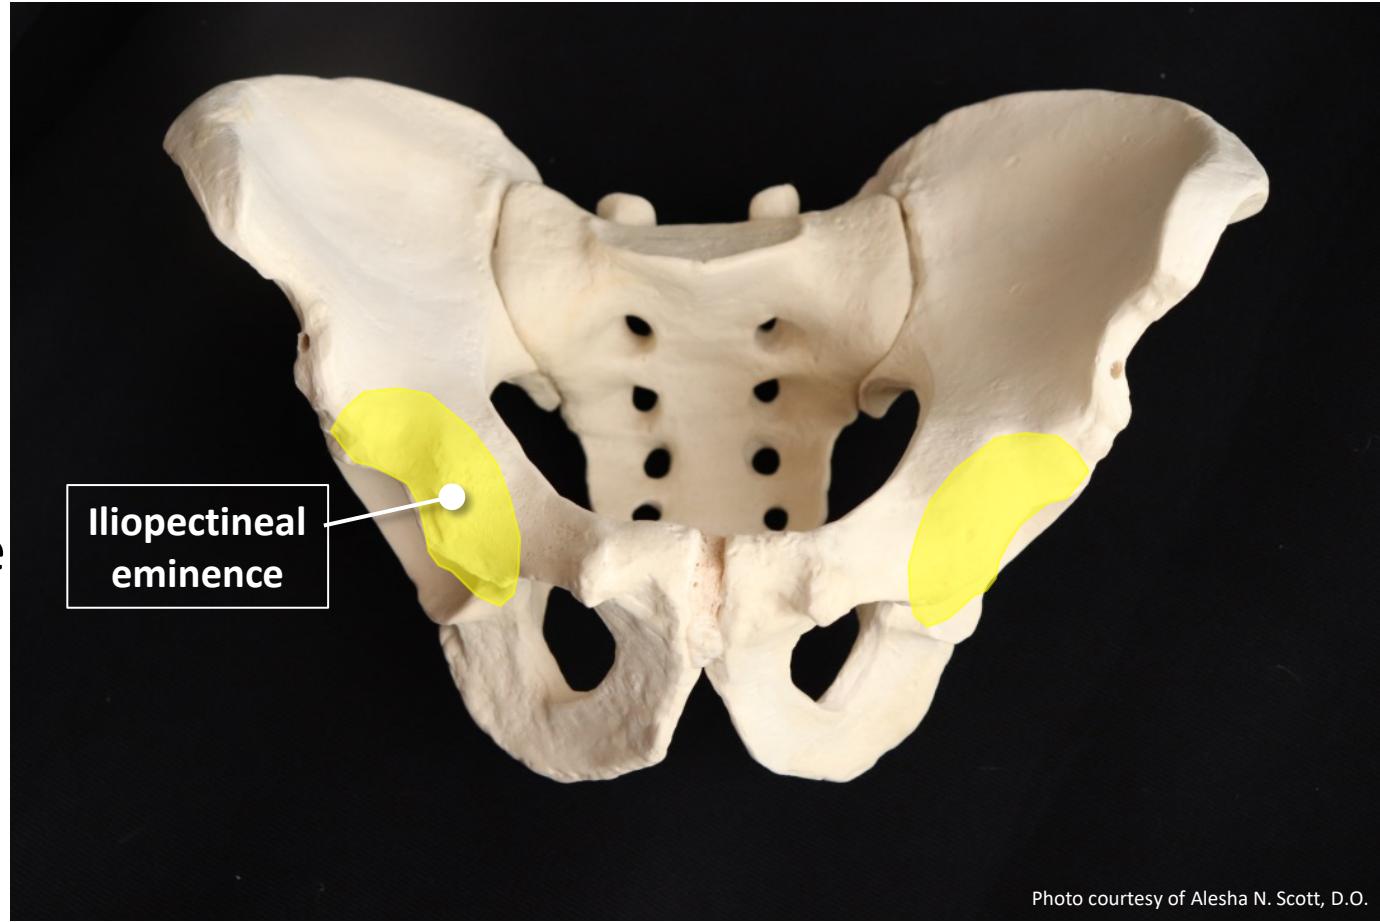

Photo courtesy of Alesha N. Scott, D.O.

# Acetabular Osteology

## Posterior wall

- Most common acetabular fracture type

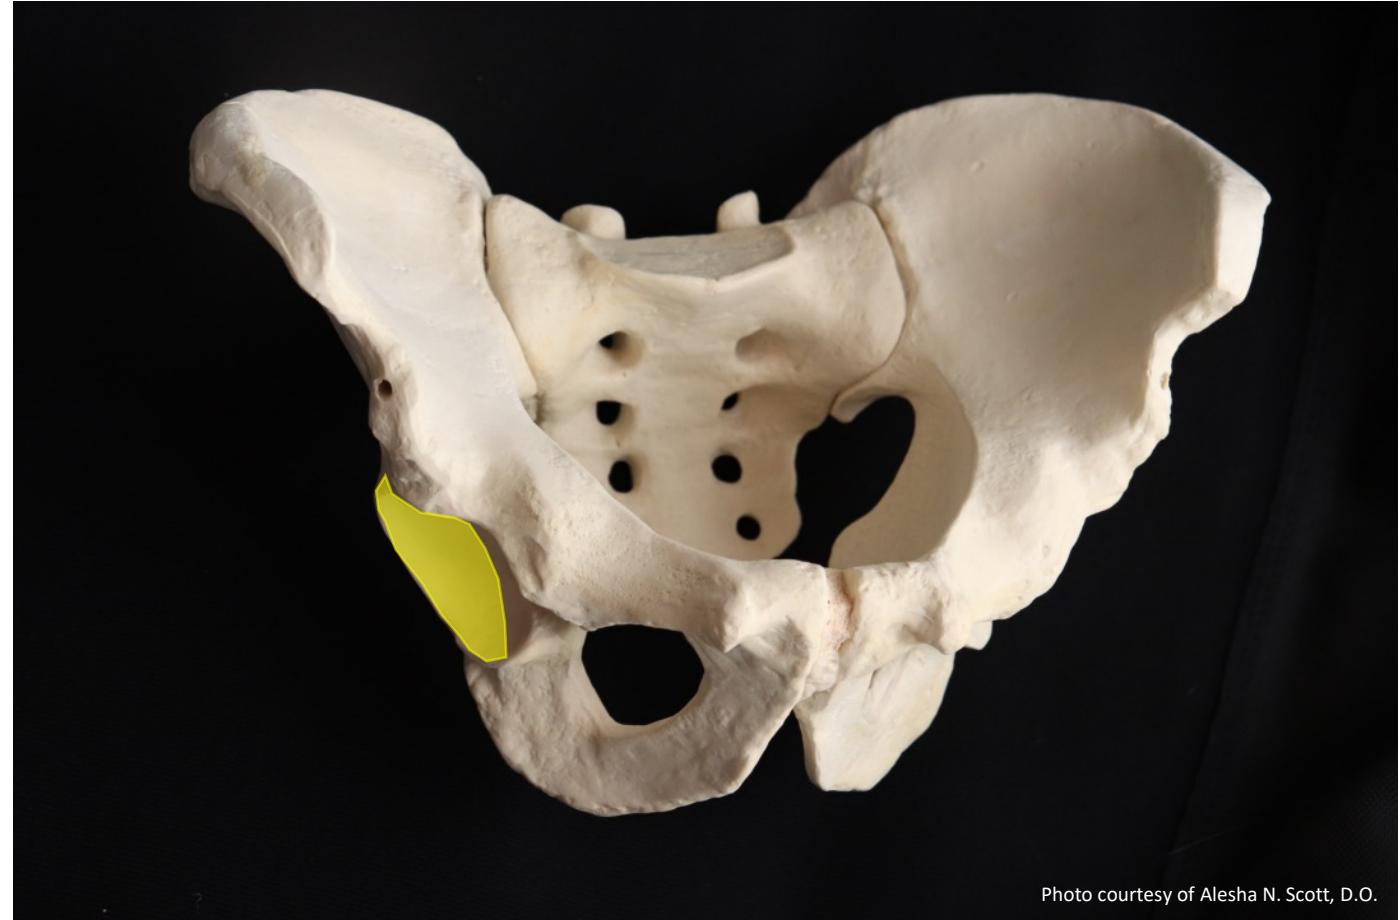

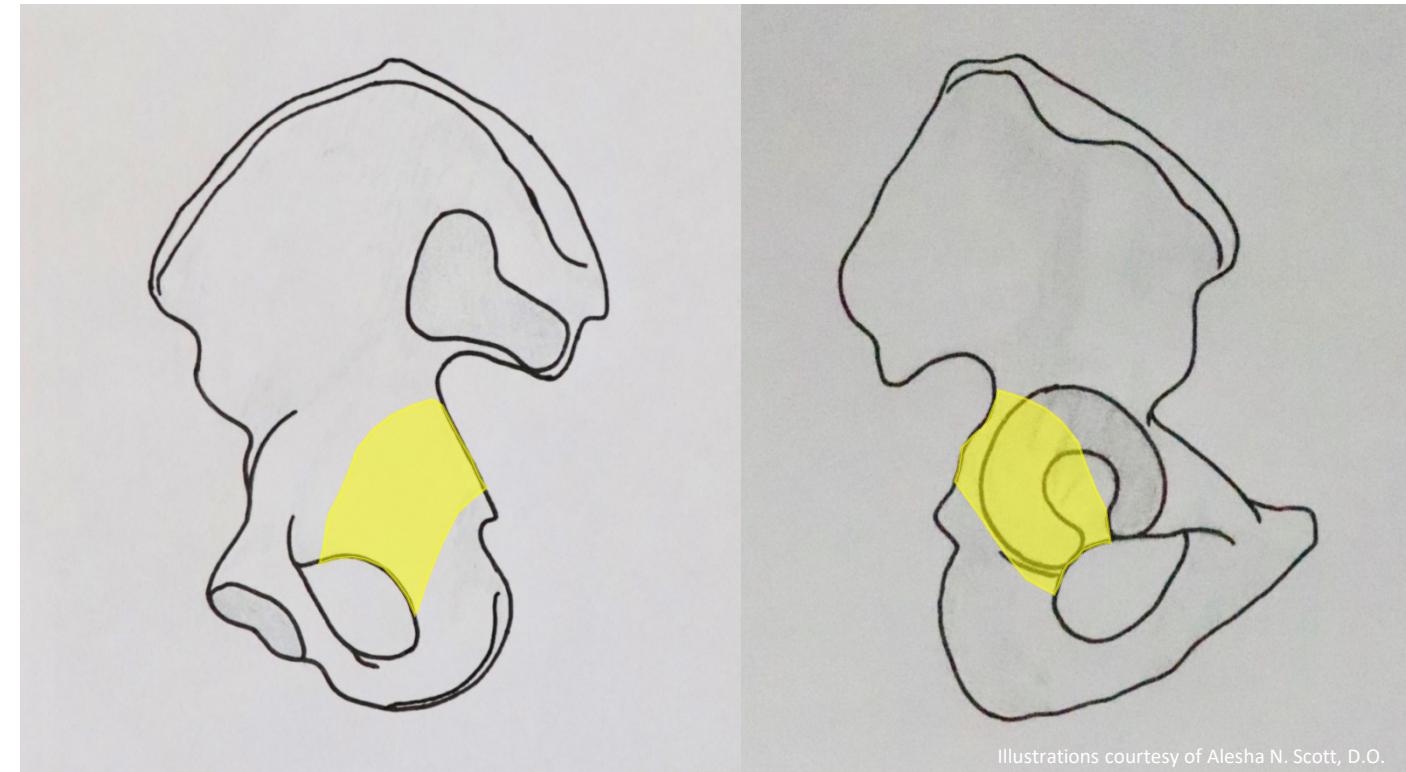

Photo courtesy of Alesha N. Scott, D.O.

# Acetabular Osteology

## Medial wall

- Quadrilateral surface + acetabular fossa
- Commonly involved in geriatric acetabular fracture patterns

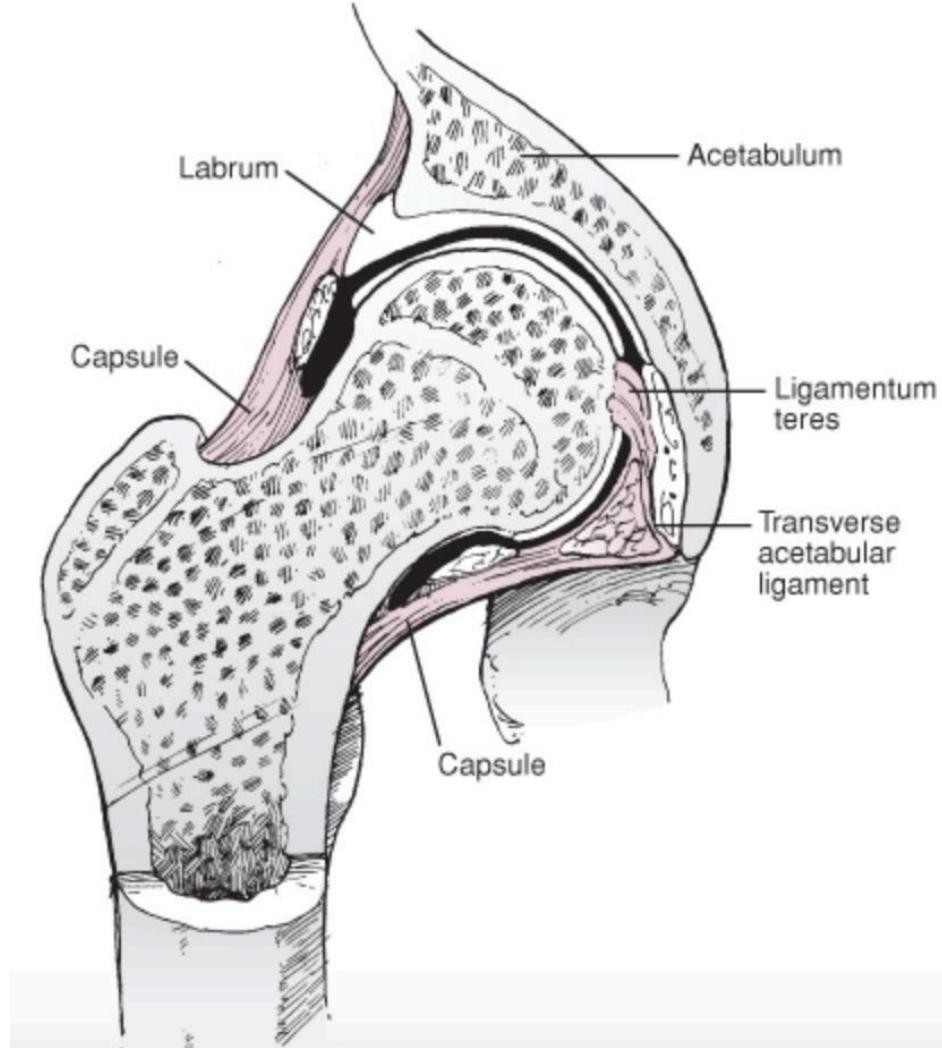

Illustrations courtesy of Alesha N. Scott, D.O.

# Ligamentous Acetabular Anatomy

# Ligamentous Acetabular Anatomy

- Capsule
- Labrum
- Ligamentum teres
- Transverse acetabular ligament

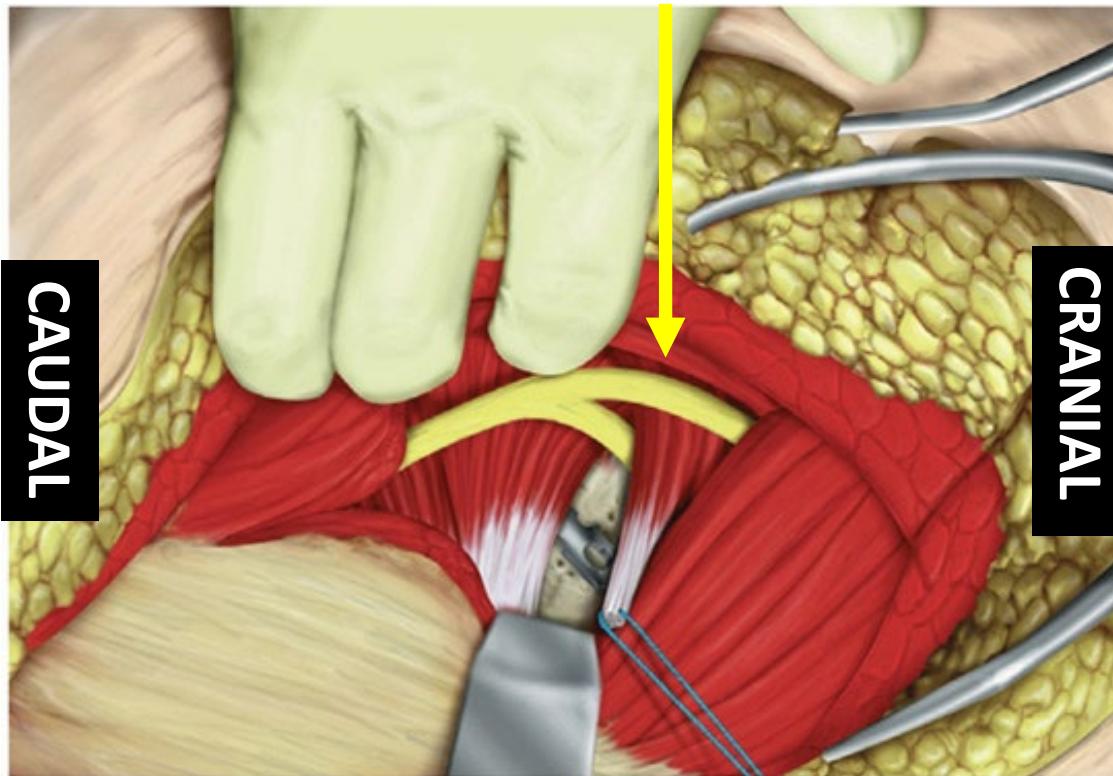

Michael S. Kain and Paul Tornetta III. Hip Dislocations and Femoral Head Fractures. In: Tornetta P, Ricci WM, eds. Rockwood and Green's Fractures in Adults, 9e. Philadelphia, PA: Wolters Kluwer Health, Inc; 2019. Figure 51-12.

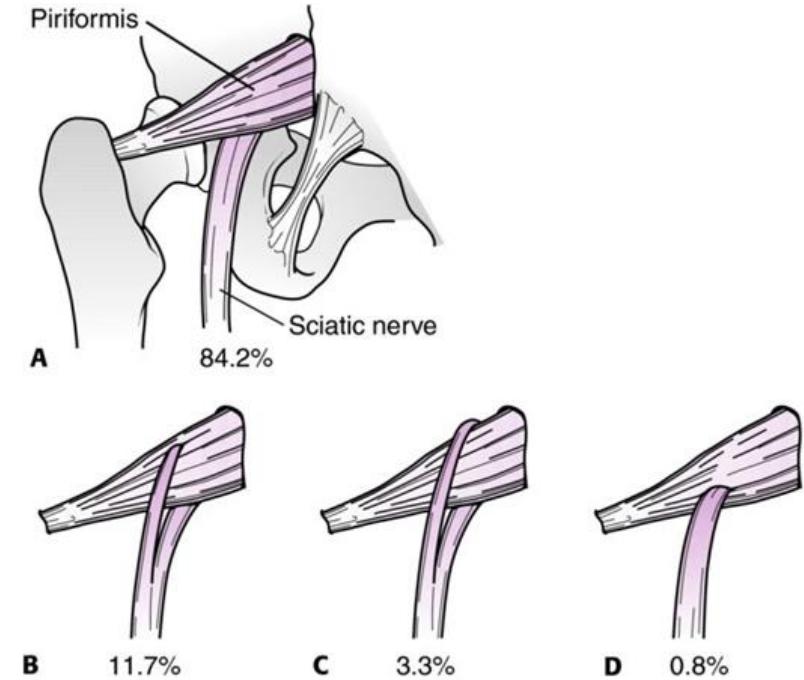

# Neurovascular Acetabular Anatomy

# Neural Acetabular Anatomy

- Sciatic nerve
  - Recognize variant anatomy!

Berton R. Moed and John A Boudreau. Acetabulum Fractures. In: Tornetta P, Ricci WM, eds. Rockwood and Green's Fractures in Adults, 9e. Philadelphia, PA: Wolters Kluwer Health, Inc; 2019. Figure 50-50.

Michael S. Kain and Paul Tornetta III. Hip Dislocations and Femoral Head Fractures. In: Tornetta P, Ricci WM, eds. Rockwood and Green's Fractures in Adults, 9e. Philadelphia, PA: Wolters Kluwer Health, Inc; 2019. Figure 51-14.

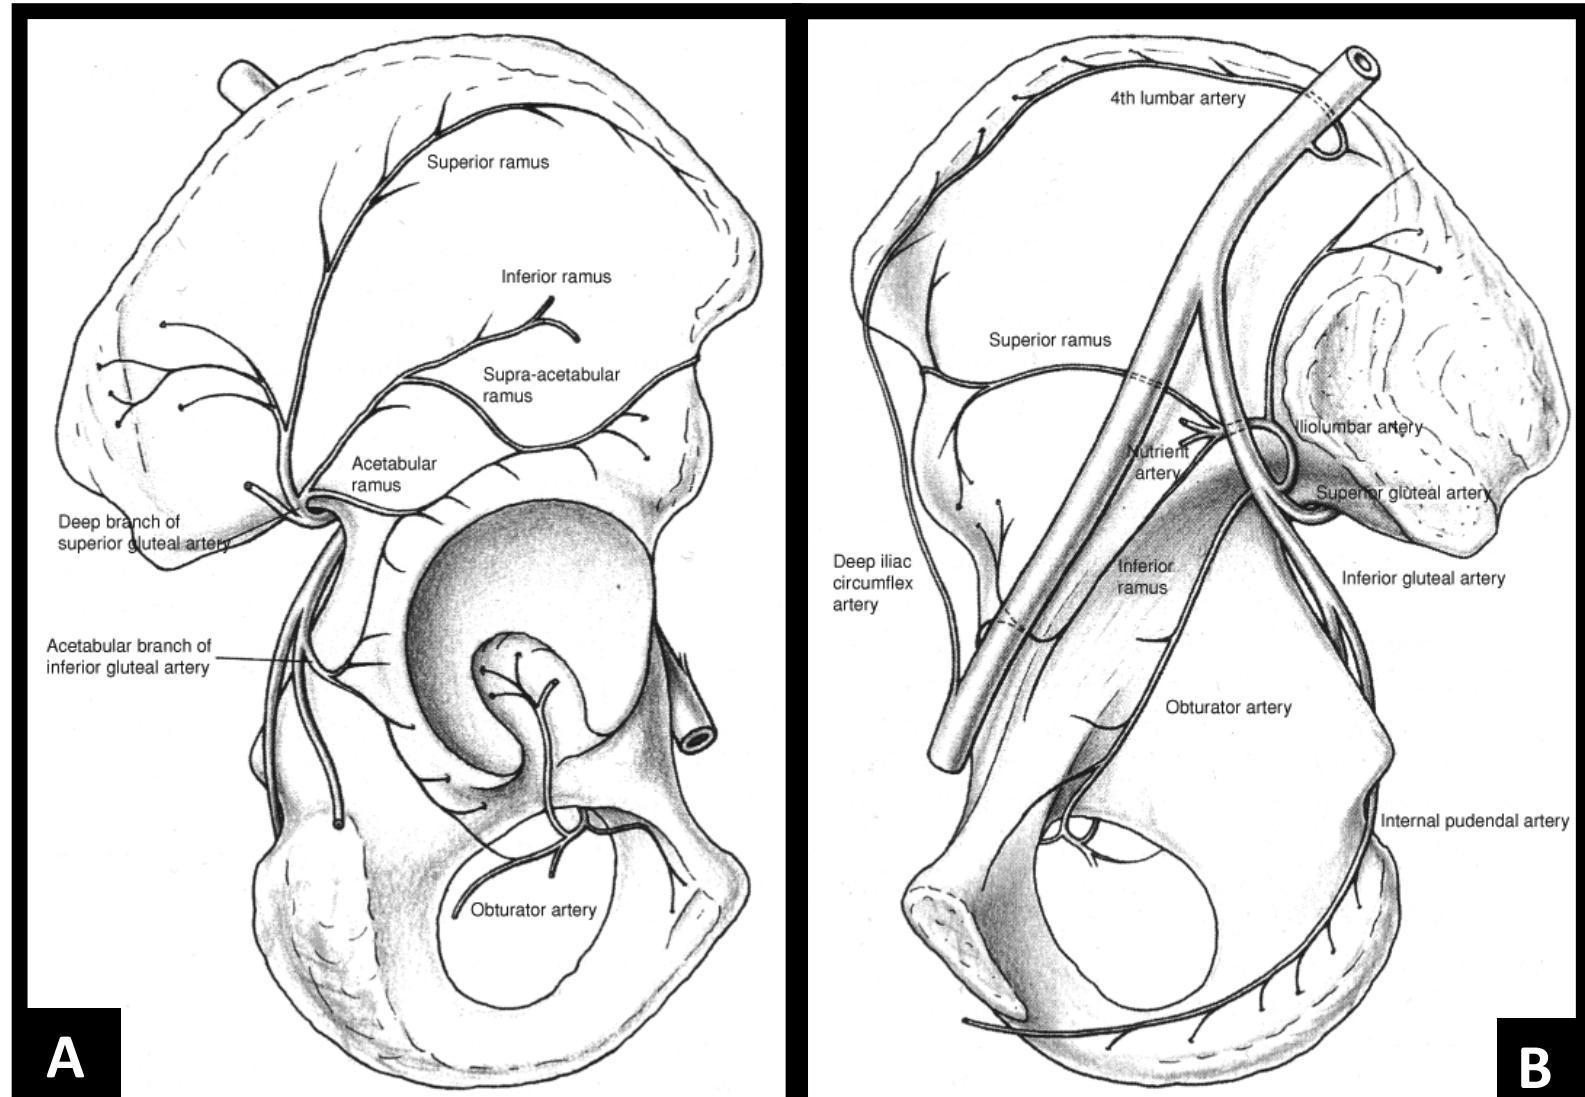

# Vascular Acetabular Anatomy

- **Lateral (A)**

- Superior gluteal artery
- Inferior gluteal artery
- Medial femoral circumflex artery

- **Medial (B)**

- Iliolumbar artery
- Obturator artery

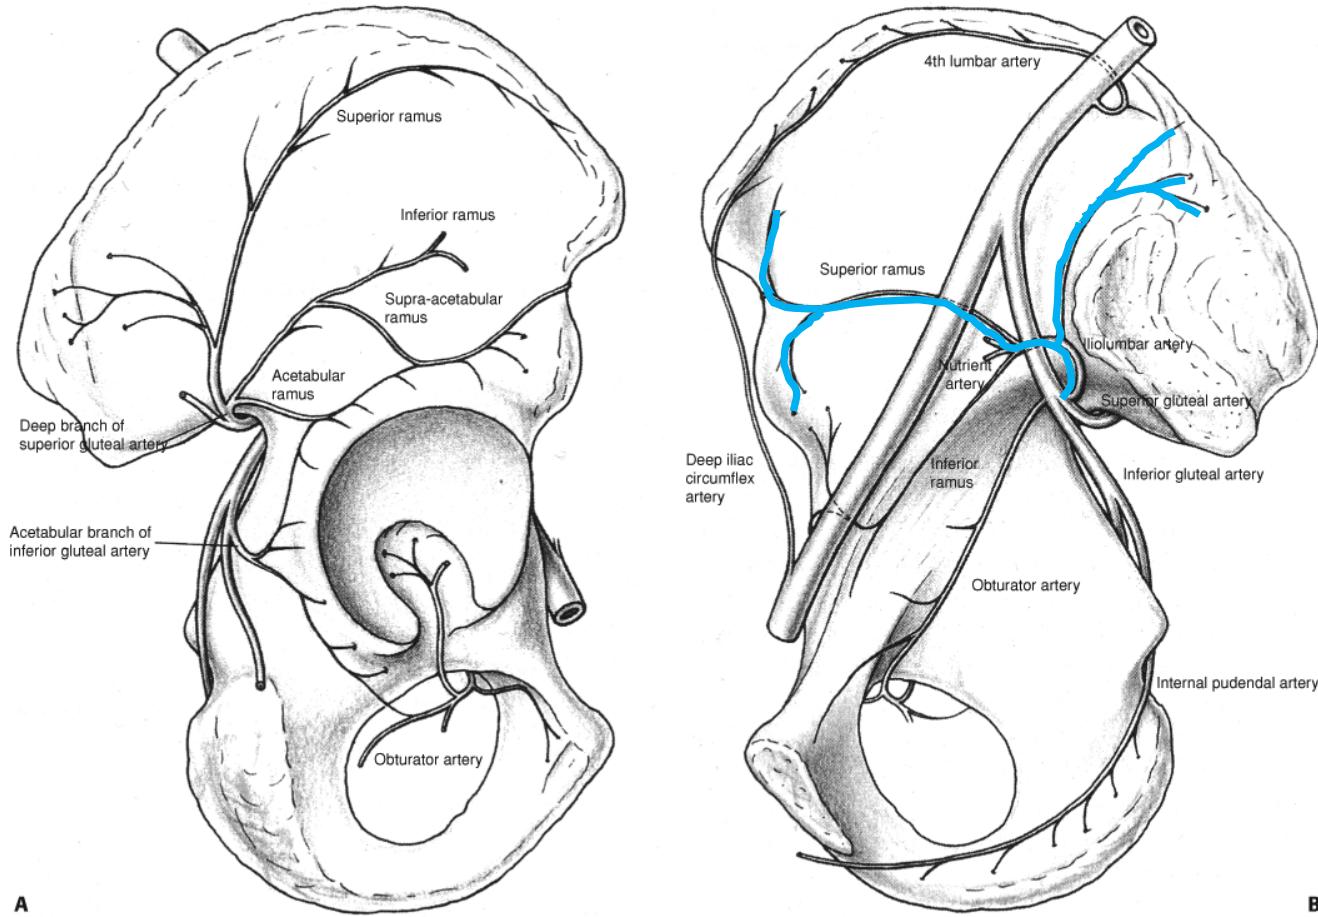

Bertон R. Moed and John A Boudreau. Acetabulum Fractures. In: Tornetta P, Ricci WM, eds. Rockwood and Green's Fractures in Adults, 9e. Philadelphia, PA: Wolters Kluwer Health, Inc; 2019. Figure 50-34.

# Vascular Acetabular Anatomy

## Iliolumbar artery

- Origination
  - From posterior trunk of internal iliac OR from the obturator
- Divisions
  - Superficial branch
  - Deep branch
    - Nutrient artery to ilium → 50% enter ilium anterior to SIJ, lateral to pelvic brim; 50% enter medial to pelvic brim

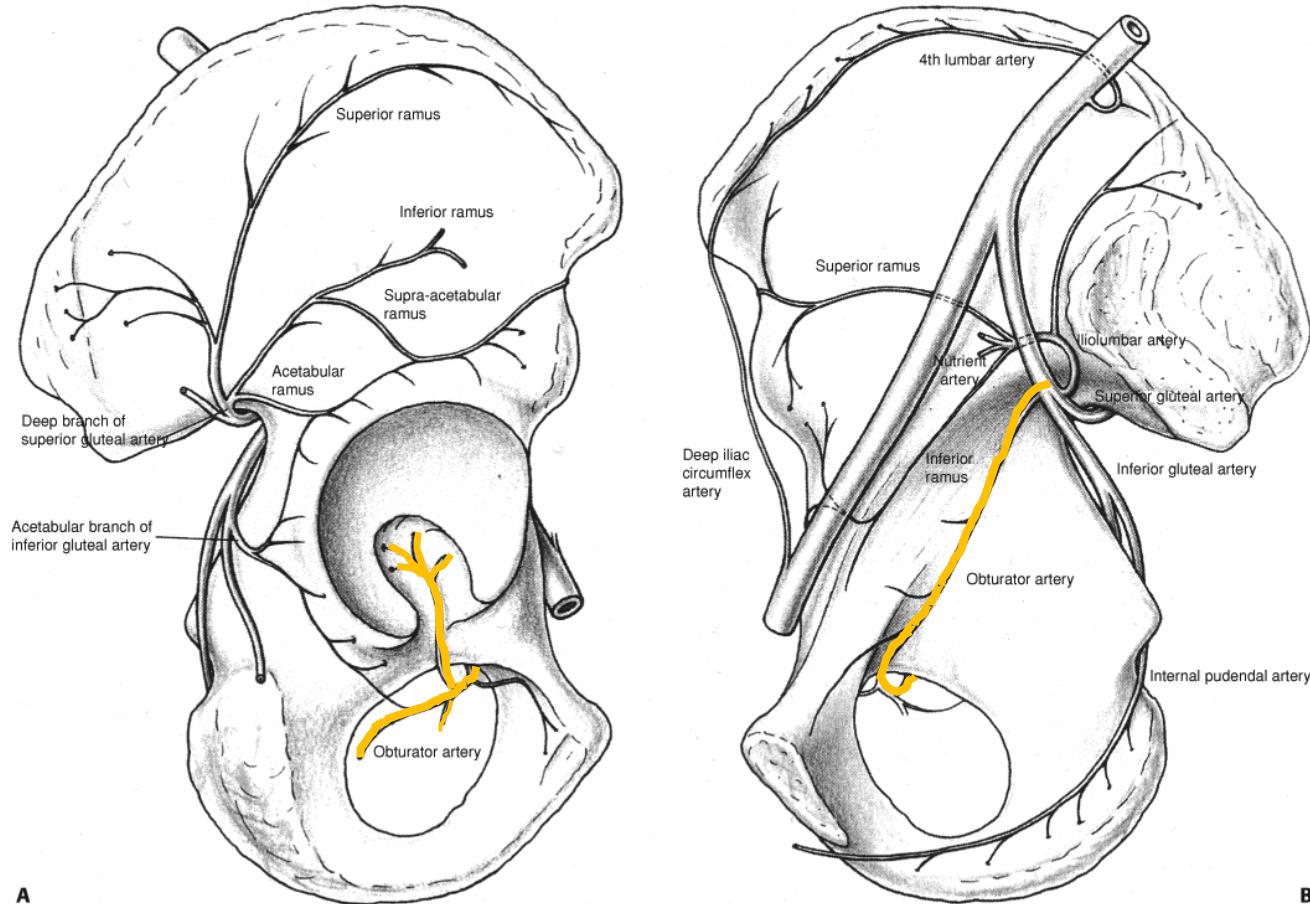

Berton R. Moed and John A Boudreau. Acetabulum Fractures. In: Tornetta P, Ricci WM, eds. Rockwood and Green's Fractures in Adults, 9e. Philadelphia, PA: Wolters Kluwer Health, Inc; 2019. Figure 50-34.

# Vascular Acetabular Anatomy

## Obturator artery

- Branches
  - Quadrilateral surface
  - Superior pubic ramus
  - Acetabular branch
    - Enters deep to transverse ligament
    - May be the terminal supply to acetabulum
- Anastomosis
  - With MFCA

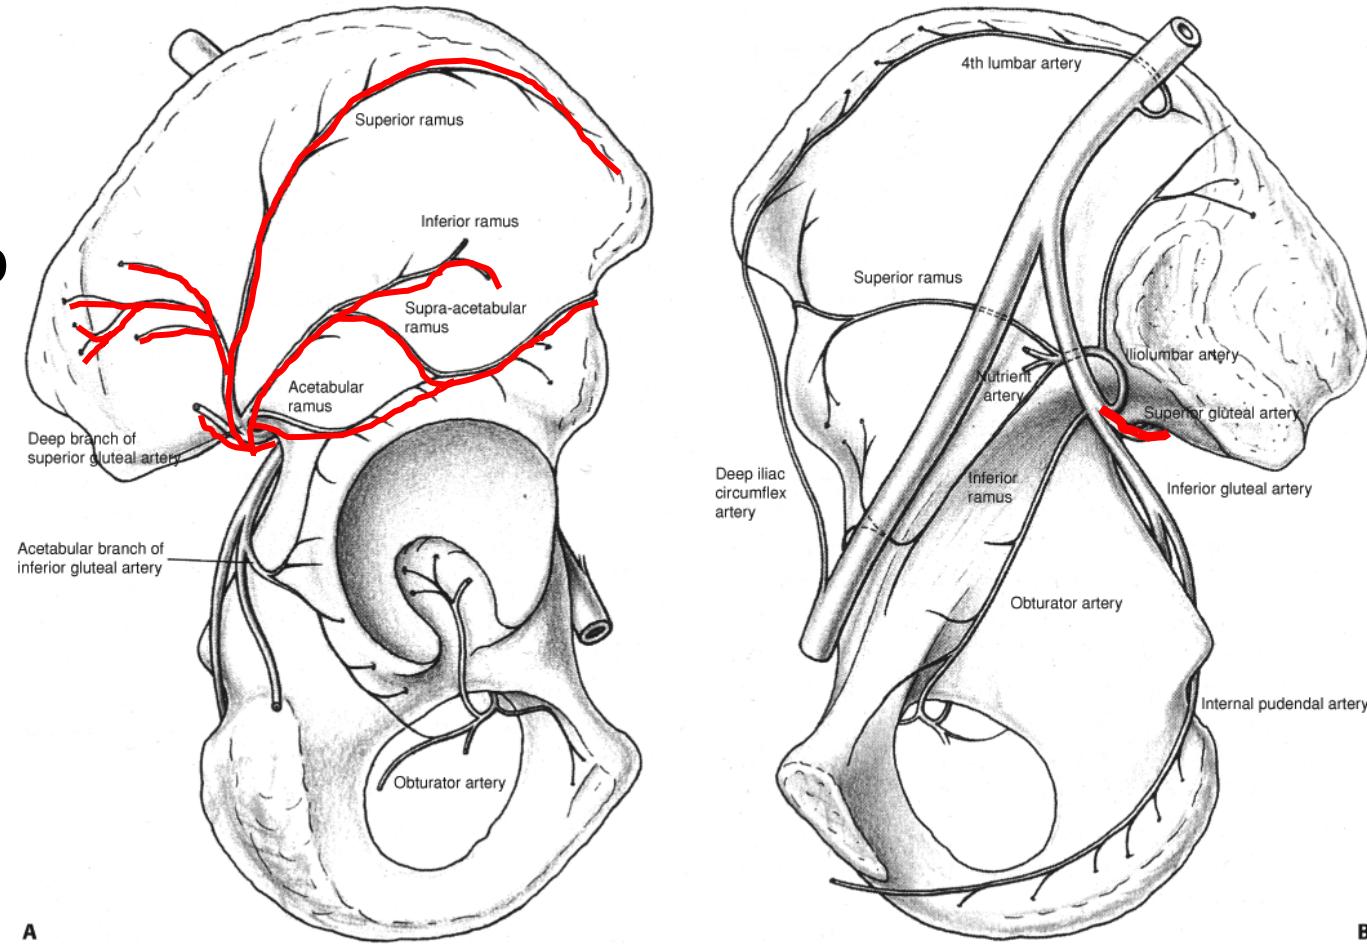

Berton R. Moed and John A Boudreau. Acetabulum Fractures. In: Tornetta P, Ricci WM, eds. Rockwood and Green's Fractures in Adults, 9e. Philadelphia, PA: Wolters Kluwer Health, Inc; 2019. Figure 50-34.

# Vascular Acetabular Anatomy

## Superior gluteal artery (SGA)

- Most important contribution to acetabular blood supply
- Branches
  - Deep
    - Superior
    - Inferior
    - Supraacetabular
    - Acetabular

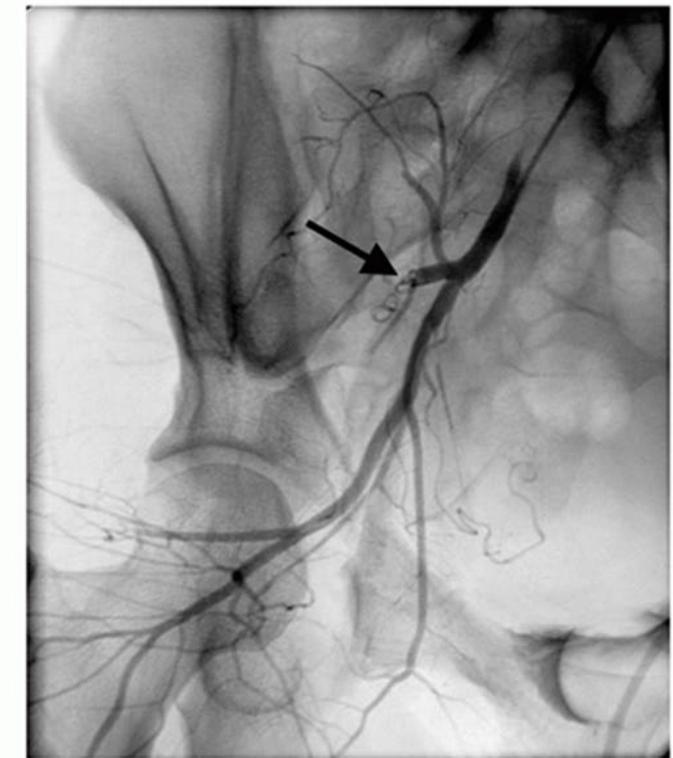

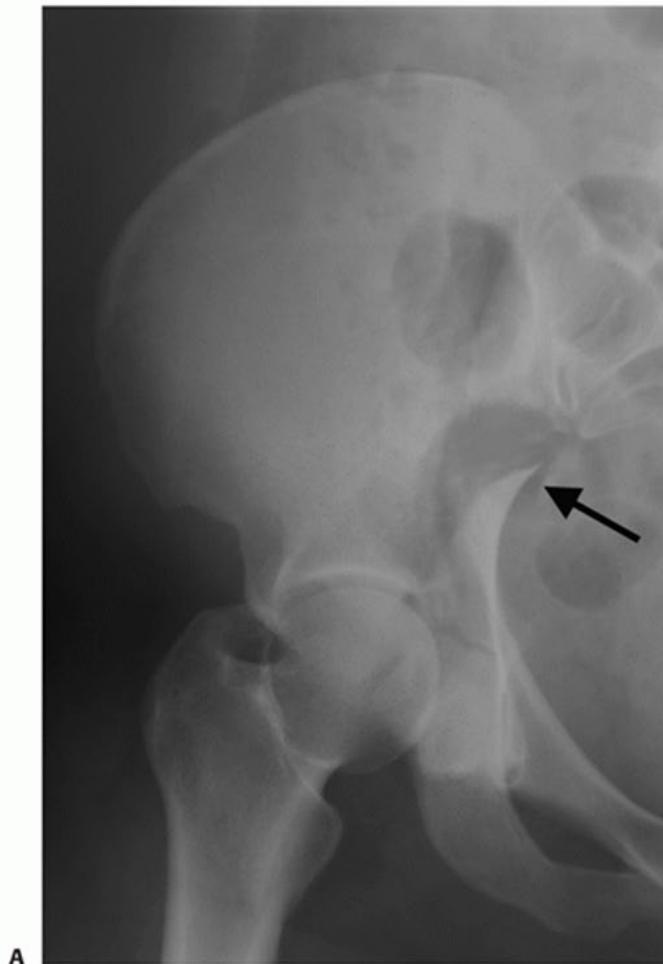

Bertin R. Moed and John A Boudreau. Acetabulum Fractures. In: Tornetta P, Ricci WM, eds. Rockwood and Green's Fractures in Adults, 9e. Philadelphia, PA: Wolters Kluwer Health, Inc; 2019. Figure 50-34.

# Vascular Acetabular Anatomy

## Superior gluteal artery (SGA)

- May be lacerated secondary to injury or retractor placement in the greater sciatic notch

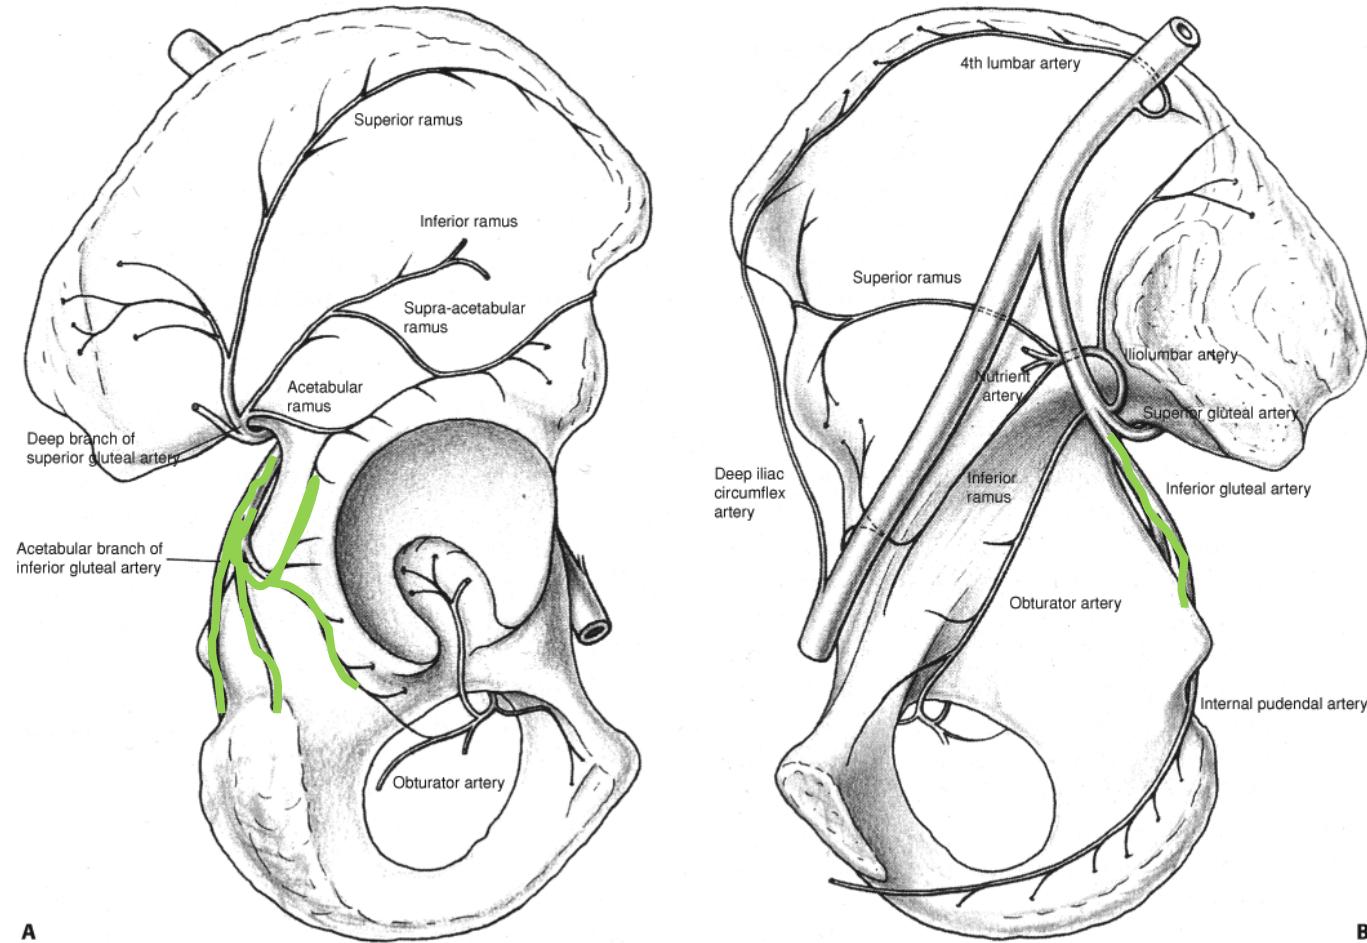

Bertoni R. Moed and John A Boudreau. Acetabulum Fractures. In: Tornetta P, Ricci WM, eds. Rockwood and Green's Fractures in Adults, 9e. Philadelphia, PA: Wolters Kluwer Health, Inc; 2019. Figure 50-3.

# Vascular Acetabular Anatomy

## Inferior gluteal artery (IGA)

- Acetabular branches
  - Deep to short external rotators
  - Between inferior gemellus and quadratus femoris
    - Anastomosis with MFCA

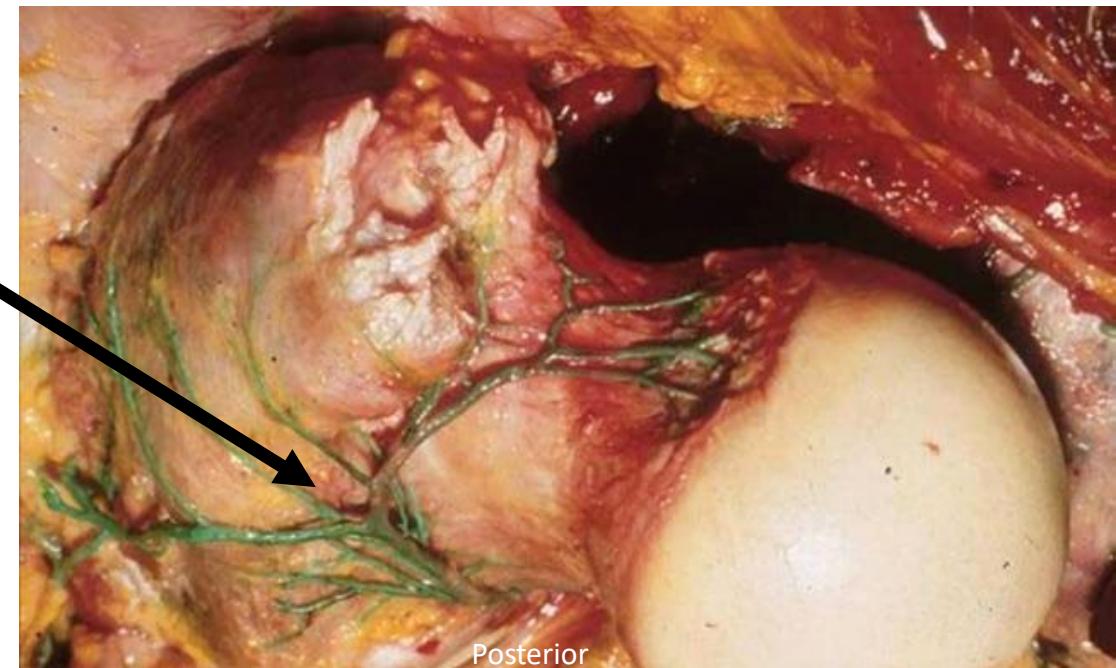

Bertoni R, Moed and John A Boudreau. Acetabulum Fractures. In: Tornetta P, Ricci WM, eds. Rockwood and Green's Fractures in Adults, 9e. Philadelphia, PA: Wolters Kluwer Health, Inc; 2019. Figure 50-34.

# Vascular Acetabular Anatomy

## Medial femoral circumflex artery (MFCA)

- Ascending branch is main blood supply to femoral head
- Deep to quadratus, obturator internus, and piriformis
- Can be damaged with
  - Dislocation of femoral head
  - Taking down quadratus from femur
  - Dissecting piriformis and obturator internus tendons off femur without adequate 1 cm tag

# Objectives Completed

- Learn the anatomy of the pelvis and acetabulum
  - Osteology
  - Ligamentous
  - Muscular
  - Neurovascular
- Differentiate the palpable landmarks
