

MOBILE LABS

Exhibit Hall 4A

WEDNESDAY-FRIDAY, OCTOBER 18-20

Stop by or make an appointment with our Industry Partner mobile labs located IN the convention center!

INDUSTRY SESSIONS

	COMPANY	TITLE	FACULTY	DESCRIPTION
WED. 7-10 PM	(Summit Building Seattle Convention Center)	Stryker Experience		Join us at the Summit Building on October 18th for The Stryker Experience, an exclusive evening reception during OTA. We look forward to sharing with you the latest innovations and product advancements that are driving forward our mission to partner with you to make healthcare better.
THURS. BREAKFAST 7:00-7:50 AM	(Room 3A)	How the CurvaFix® IM Implant has Become a Part of My Practice In the Treatment of High Energy and Fragility Fractures of the Pelvis	<i>Brett Crist, MD Pol M. Rommens, MD John Michael Yingling, MD Samir Mehta, MD Langdon Hartsock, MD Matthew Gardner, MD</i>	Learn how surgeons are utilizing the CurvaFix Implant to treat challenging pelvic morphology, periprosthetic fracture, and Fragility Fractures of the Pelvis (FFP). This session will feature an update in early usage data, case presentations, and FFP evidence update.
	(Room 3B)	Periprosthetic Femur Fractures: Fixation Methods	<i>Michael McKee, MD Jan Paul Szatkowski, MD Emil Schemitsch, MD</i>	Addressing a major challenge for orthopaedic surgeons. Due to the aging population and growing number of total joint replacements, periprosthetic fractures are becoming increasingly frequent. Join us for a case-based discussion on the varying treatment options for periprosthetic fractures of the femur and a look into the future of plating.
	(Room 307-308)	Uncovering the Tumor-Induced Osteomalacia (TIO) Patient: Diagnostic and Management Needs		Hidden in plain sight: The journey to diagnosis for patients with rare diseases.
THURSDAY LUNCH 12:10-1:00 PM	(Exhibit Hall Theater A)	Advanced Solutions for Complex Cases – EVOS Large and Periprosthetic Plates	<i>Daniel Dziadosz, MD Michael Kain, MD Samir Mehta, MD</i>	
	(Exhibit Hall Theater B)	Case Calamities & Coffee	<i>Michael Archdeacon, MD Jonathan Eastman, MD Leah Gitajn, MD Joseph Hsu, MD</i>	Nothing is ever as simple as it seems. Stryker invites you to join an interactive session where our faculty will present and discuss some of their own case calamities and experiences in orthopaedic trauma.
	(Exhibit Hall Theater C)	Nailing the Distal Femur: Advanced Techniques and Technologies	<i>Hassan R. Mir, MD, MBA Clay Spitler, MD</i>	Distal femur fractures are a complex and challenging indication. This session will showcase two esteemed faculty in an interactive review of the current treatment options, including plating, nailing and the unique use of a side washer in combination with retrograde nailing.

39TH ANNUAL MEETING

INDUSTRY SESSIONS

	COMPANY	TITLE	FACULTY	DESCRIPTION
THURSDAY LUNCH 12:10-1:00 PM (CONTINUED)	 3M Science. Applied to Life.™	Compelling New Evidence in Postoperative Incision Management: Why ciNPT Should Be Standard of Care in Orthopaedic Trauma Surgery	<i>Brett D. Crist, MD</i>	
	(Room 3A)			
	 ZIMMER BIOMET Moving You Forward.™	Trauma and Biologics Toolbox	<i>Erik Kubiak, MD and others</i>	This panel focuses on those ancillary approaches and treatment solutions such as biologics, mini-frag plates, staples and so forth that contribute to success in challenging trauma cases.
	(Room 3B)			
	 skeletal dynamics UNDERSTANDING THE UPPER EXTREMITY	Surgical Management of Intra-articular, Supracondylar & Diaphyseal Fractures of the Humerus	<i>Jorge L. Orbay, MD Edgar T. Araiza, MD</i>	Join us for an interactive session in which our faculty will present and discuss recent innovations in the treatment of complex distal humeral fractures. Learn how our TiBeam® technology allows you to achieve a rigid, angularly stable and unified construct with controlled compression across the trochlea.
(Room 303)				
THURSDAY LUNCH 12:10-1:00 PM (CONTINUED)	 SI-BONE	SI Disruptions & Fragility Fractures: When You Need More than Just a Screw	<i>Michael J. Gardner, MD Brian Cunningham, MD Richard Yoon, MD Malcolm DeBaun, MD</i>	Learn about the intraoperative benefits and outcomes from surgeons incorporating porous, 3D-printed threaded implants into their pelvic constructs for both high and low energy trauma.
	(Room 307-308)			
	 BONESUPPORT	Finally, the Right Technology for the Surgical Management of Bone Infections	<i>Stephen Quinnan, MD Jon Carlson, MD George Ochenjele, MD</i>	Join a panel of distinguished surgeon faculty as they present cases and discuss their approach to bone infection management. They will review their experience with CERAMENT® G, the only FDA cleared bone healing technology that elutes antibiotics and is indicated for the treatment of osteomyelitis, and discuss surgical techniques using unique delivery tools.
(Room 310)				
FRIDAY BREAKFAST 7:00-7:50 AM	 bonebridge reducing complexity	Proximal Humerus Fractures - A Transatlantic Perspective	<i>Marc Swiontkowski, MD (Minneapolis, MN, USA)-Moderator Andrew M. Choo, MD (Houston, TX, USA) Christian Gerber, MD (Zurich, Switzerland) Beat Moor, MD (Sion, Switzerland)</i>	In this session, renowned orthopaedic surgeons from both sides of the Atlantic will share their expertise on the challenges of proximal humerus fractures. Join our international faculty in exploring options to ultimately reduce complexity in orthopaedic trauma.
	(Room 3A)			
	 MYO1	Under Pressure - Latest Data in Using Pressure Trends to Manage Compartment Syndrome Risk in the Clinical Setting		
(Room 3B)				

39TH ANNUAL MEETING

INDUSTRY SESSIONS

FRIDAY LUNCH 12:45-1:35 PM

COMPANY	TITLE	FACULTY	DESCRIPTION
 (Exhibit Hall Theater A)	Damage Control Orthopaedics	<i>Michael Beebe, MD</i> <i>Daniel Dziadosz, MD</i> <i>Brandon Hull, MD</i> <i>Ravi Karia, MD</i> <i>Jonathan Quade, MD</i>	
 ZIMMER BIOMET <i>Moving You Forward.™</i> (Exhibit Hall Theater B)	Complex Cases in Upper Extremity Trauma: From the Shoulder to the Wrist	<i>Anil Dutta, MD</i> <i>Aman Luther, MD</i>	This panel focuses on complex cases in upper extremity trauma, ranging from the shoulder to the wrist, offering a range of solutions from repair to replacement.
 DePuy Synthes <small>THE ORTHOPAEDICS COMPANY OF Johnson & Johnson</small> (Exhibit Hall Theater C)	Demystifying Ring Fixation: When & How to Add Frames to Your Trauma Practice	<i>Malcolm R. DeBaun, MD</i> <i>John C. Hagedorn II, MD</i> <i>J. Spence Reid, MD</i>	There's no time like the present to realize the impact framing could have on your existing practice and patients. Join DePuy Synthes for a surgeon-led panel discussion around how each initially began their framing practice, common indications and case examples applicable to your existing trauma work, and the tips, pitfalls, and misconceptions to be cognizant of as you take on this new skillset. This session is perfect for beginner and advanced framers alike.
 (Room 3A)	Arthrex Trauma: Fixing the Unfixable	<i>Andrew M. Choo, MD</i> <i>(UT Houston)</i> <i>Jonah Hebert-Davies, MD</i> <i>(Harborview)</i> <i>Mark J. Gage, MD</i> <i>(Shock Trauma)</i> <i>John W. Munz, MD</i> <i>(UT Houston)</i>	It's time for a fresh perspective. This case-based "lunch-and-learn" focuses on big saves for severe injuries. Come learn how novel technology is changing trauma care.
 skeletal dynamics® <small>UNDERSTANDING THE UPPER EXTREMITY</small> (Room 3B)	Making Treatment of the Terrible Triad & Complex Elbow Instability Easier using the Distal Elbow System	<i>Jorge L. Orbay, MD</i> <i>Edgar Araiza, MD</i>	Join us for an interactive session in which our faculty will present recent innovations in the treatment of complex elbow fractures. Our faculty will discuss their experience with the Skeletal Dynamics Distal Elbow Set (DES) and how this all-in-one comprehensive system addresses these challenging reconstructions.
 CONVENTUS FLOWER ORTHOPAEDICS (Room 303)	Flex-Thread™ Ulna & Distal Fibula Nailing – The Latest Solution to Intramedullary Fixation of the Ulna and Fibula	<i>Anjan R. Shah, MD</i> <i>Steve Haman, MD</i>	Join us for an interactive session where our surgeon faculty will present recent innovations in the treatment of ulnar and fibular fractures. Our faculty will present their experiences and clinical cases with the Flex-Thread™ Ulna and Distal Fibular Nail Systems.
 PBC BIOMED <small>Accelerating Medical Innovation</small> (Room 307-308)	Strengthening the Bond: A New Look at Biomaterials as Fixation Devices	<i>J. Tracy Watson, MD</i> <i>Peter Giannoudis, MD</i> <i>Hassan R. Mir, MD, MBA,</i> <i>FIOTA</i> <i>(Tony Russell, MD)</i>	
 NUVASIVE <small>Specialized Orthopedics</small> (Room 310)	Latest Advancements to Treating Complex Reconstruction with the Precice® Magnetic Technology	<i>James Blair, MD</i> <i>Geoffrey Marecek, MD</i> <i>John A. Scolaro, MD, MA</i> <i>Matthew Gardner, MD</i>
