Artificial Intelligence (AI) Policy

OTA acknowledges the use of generative artificial intelligence (AI) and AI-assisted technologies by authors to enhance readability and language proficiency in the creation of written content and/or manuscript preparation. This policy outlines the responsible and accountable use of these technologies to maintain the integrity of content.

Authors utilizing AI or AI-assisted technologies during the writing process are responsible for ensuring accuracy and credibility of their work. The application of such technology should be thoroughly reviewed for accuracy and meticulously edited before submission.

Authors must be transparent in disclosing the use of AI and AI-assisted technologies in the writing process.

OTA commits to monitoring the advancement in AI and AI-assisted technology development will adjust or refine this policy when appropriate.
